Teaching English Language Learners Through Technology Jan 27 2020 In Teaching English Language Learners through Technology, the authors explore the use of computers/technology as a pedagogical tool to aid in the appropriate instruction of ELLs across all content areas. The special focus of this book is on the informed use of various technologies and software programs that can specifically aid ELLs. Strategies are also provided for varying levels of access--whether teachers teach in a one computer classroom, have access to multiple computers, or have the ability to go into a computer lab at their school. A fully annotated list of web and print resources completes the volume, making this a valuable reference to help teachers harness the power of computer-assisted technologies in meeting the challenges of including all learners in effective instruction.

No Longer at Ease Jul 21 2019 Obi Okonkwo is an idealistic young man who, thanks to the privileges of an education in Britain, has now returned to Nigeria for a job in the civil service. However in his new role he finds that the way of government seems to be backhanders and corruption. Obi manages to resist the bribes that are offered to him, but when he falls in love with an unsuitable girl - to the disapproval of his parents - he sinks further into emotional and financial turmoil. The lure of easy money becomes harder to refuse, and Obi becomes caught in a trap he cannot escape. Showing a man lost in cultural limbo, and a Nigeria entering a new age of disillusionment, No Longer at Ease concludes Achebe's remarkable trilogy charting three generations of an African community under the impact of colonialism, the first two volumes of which are Things Fall Apart and Arrow of God.

Human Rights and Ethics: Concepts, Methodologies, Tools, and Applications Oct 16 2021 In today's increasingly interconnected and global society, the protection of basic liberties is an important consideration in public policy and international relations. Profitable social interactions can begin only when a foundation of trust has been laid between two parties. Human Rights and Ethics: Concepts, Methodologies, Tools, and Applications considers some of the most important issues in the ethics of human interaction, whether in business, politics, or science and technology. Covering issues such as cybercrime, bioethics, medical care, and corporate leadership, this four-volume reference work will serve as a crucial resource for leaders, innovators, educators, and other personnel living and working in the modern world.

*Handbook of Research on Political Activism in the Information Age* Jun 12 2021 Technology, and particularly the Internet, has caused many changes in the realm of politics. Mainstream media no longer has a monopoly on political commentary as social media, blogs, and user-generated video streaming sites have emerged as an outlet for citizens and political activists to openly voice their opinions, organize political demonstrations, and network online. The Handbook of Research on Political Activism in the Information Age includes progressive research from more than 39 international experts at universities and research institutions across 15 different countries. Each of the 25 scholarly chapter contributions focus on topics pertaining to the application of information technology, engineering, and mathematics to political activism. Through its analysis of the methods for political activism in the information age, the effectiveness of these methods, as well as emerging analytical tools, this book is designed for use by researchers, activists, political scientists, engineers, computer scientists, journalists, professors, students and professionals working in the fields of politics, e-government, media and communications, and Internet marketing.

*How to Become a Straight-A Student* Sep 03 2020 Looking to jumpstart your GPA? Most college students believe that straight A's can be achieved only through cramming and painful all-nighters at the library. But Cal Newport knows that real straight-A students don't study harder—they study smarter. A breakthrough approach to acing academic assignments, from quizzes and exams to essays and papers, *How to Become a Straight-A Student* reveals for the first time the proven study secrets of real straight-A students across the country and weaves them into a simple, practical system that anyone can master. You will learn how to: • Streamline and maximize your study time • Conquer procrastination • Absorb the material quickly and effectively • Know which reading assignments are critical—and which are not • Target the paper topics that wow professors • Provide A+ answers on exams • Write stellar prose without the agony A strategic blueprint for success that promises more free time, more fun, and top-tier results, *How to Become a Straight-A Student* is the only study guide written by students for students—with the insider knowledge and real-world methods to help you master the college system and rise to the top of the class.

*Business Management Practice Test Workbook for Senior Secondary School Certificate* Dec 18 2021 This book, Questions & Answers for Senior Secondary School Certificate Examination PassTrack Series, contains over 500 business management questions administered by the WAEC. It is structured to follow past standard questions used to test the Senior Secondary School students. Some of the questions are actual past examination questions whilst others are standard mock questions that can be examined at this basic level of business management education. The questions cover all key topics of business management outlined in the WASSCE syllabus. The book is written with students in mind to reinforce the key concepts of business management. A word of caution! Students are not expected to study only the Questions & Answers and expect to get excellent results. It is hoped that students will use this Q&A book alongside with Volumes I, II and III of the Business Management for SSSCE PassTrack Series for excellent results.

*School Science Practical Work in Africa* Apr 29 2020 *School Science Practical Work in Africa* presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research-informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry-based learning, which signals a definite paradigm shift from the traditional teacher-dominated to a learner-centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work, and professional development in teaching practical work. This book will be of great interest to academics, researchers and post-graduate students in the fields of science education and educational policy.

*The Challenges Of South-south Cooperation* Apr 10 2021 The process of economic cooperation among developing countries has come a long way since the early 1960s. Alongside the movement from the establishment of regional and subregional integration and cooperation groupings to the elaboration of concepts and approaches for global and interregional cooperation (such as, for example, the scheme for a global system of trade preferences among developing countries), there

has been an extension of the scope of cooperation, originally focused on trade, to other areas, including monetary and financial matters, production, marketing, and so on. Today, the process of economic cooperation among developing countries occupies an important place in the economic strategies and policies of developing countries and, in recent years, with the marked deterioration in the world economic situation and the weakening of international cooperation for development, it has acquired even greater importance and urgency. Indeed, in view of the prospects for the world economy for the coming years, it has become an imperative if the developing countries are going to be able to envisage the transformation of their economies and the growth rates they need.

**My Years in the Early Peace Corps Mar 29 2020** In this book Sonja Krause Goodwin recounts her experience joining the Peace Corps in 1964 and describes the training she underwent to teach in Nigeria at Columbia Teachers College in New York City. Goodwin tells readers about her service as a University teacher in physics while also serving as head of the Physics Department at Lagos University in Nigeria. She also describes her vacation travels during that time, mostly in Nigeria— including an attempt to climb Mt. Cameroon. She writes about her interactions with her students, her fellow University teachers and other University employees, her fellow Peace Corps volunteers and other expatriates, and Nigerians whom she met under during her travels. Goodwin also delves into the politically motivated “university crisis” that led to the exodus from the university and Nigeria of almost all the expatriate teaching staff of the university including the Peace Corps volunteers. She also discusses some of her work for the West African Examinations Council and the Aptitude Testing Unit in Lagos while waiting to be sent to another assignment for her second year in the Peace Corps.

**The Archival Box Jan 19 2022** King Ainose had two wives and three daughters but he had no son— an heir. He became cantankerous towards his wives and was desperate to have an heir to succeed him. King Ainose married Nurse Eki as his third wife and hoped for male twins. He gave his trusted guard, Nosa a box before he died. It's a secret between them. What is in the box? Who killed King Ainose?

**Testing Students With Disabilities Sep 15 2021** Soon, most states will mandate testing for all students. How should students with disabilities participate in district and statewide tests? How will educators make sure the requirements are met and ensure that each student's Individualized Education Program (IEP) is followed? This new guide translates the issues surrounding state and district testing of students with disabilities into what educators need to know and do. You'll find the tools to begin the process of implementing meaningful tests for all your students.

***Challenges and Prospects in African Education Systems Feb 08 2021*** Challenges and Prospects in African Education System: The general idea this book is trying to disseminate is to inform readers about the compelling challenges and prospects in African system of education. As we all know, when issues of Africa educational system is raised, the first set of thoughts that come to mind is decline in standard, deterioration of facilities, examination malpractices, cult crises or school-based violence, shortage of

teachers, underqualified teachers, and poor teachers performance, which results in poor learning standards, lack of classroom discipline that is exacerbated by insufficient resources and inadequate infrastructure, failure of appropriate inspection and monitoring, and confusion caused by changing curricula without proper communication and training. All these have led to massive demoralization and disillusionment among teachers and a negative and worsening perception of African system of education. This, therefore, calls for in-depth analysis aimed at tutoring every stakeholder in education on how their action and inactions have individually and collectively contributed to the collapsing state of education in Africa. However, the prospect is that Africa's recovery and sustainable development can only be guaranteed through expansion and sustenance of both quantitative and qualitative of the continent's stock of human capital through education. In order for education to realize its key role in development, it must be provided to the younger segments of African society as quickly as human and financial resources permit, with the ultimate goal of developing a comprehensive, meaningful and sustainable system of education at all levels and for all age groups. This is the message that this book puts across in the six knitted sections.

*Out of Africa & Into the Cloud* Feb 20 2022 Are you a girl who is scared of getting into tech? Have you failed at a few computer science classes, felt like technology is for boys, and considered giving up? In a class of 150 students where less than 1% were female and there was only one computer for everyone to learn from, Dr. Isi Idemudia faced and overcame her fears and after graduating with a Ph.D. in Technology Management, attained a position at Accenture, a leading global professional services company. *Out of Africa & Into the Cloud* will provide you with a step by step guide on how to 1. Build a solid career in the field of technology 2. Choose the IT Certification that is right for you 3. Become very successful in the world of technology 4. Break your limiting beliefs and smash it. The foreword is written by Annette Rippert, who is Group Chief Executive, Accenture Strategy and Consulting. Throughout her career, Annette has led Accenture's business across multiple industry sectors, including communications, media, technology, as well as health and public service. She is an avid supporter of girls and women in technology and received the 2018 Woman of Excellence Award in STEM from the National Association of Female Executives (NAFE) and the 2017 Leadership Award from Women in Technology. Recognition for her work includes the CIO 100 Award and Smithsonian Computerworld Award. If you follow the steps provided in this book, I promise you would be confident in venturing into technology and knowing exactly how to smash it!

*Biometric Recognition* Oct 24 2019 Biometric recognition-the automated recognition of individuals based on their behavioral and biological characteristic-is promoted as a way to help identify terrorists, provide better control of access to physical facilities and financial accounts, and increase the efficiency of access to services and their utilization. Biometric recognition has been applied to identification of criminals, patient tracking in medical informatics, and the personalization of social services, among other things. In spite of substantial effort, however, there remain unresolved questions about the effectiveness and management of systems for biometric recognition, as well as the appropriateness and societal impact of their use. Moreover, the general public has been exposed to biometrics largely as high-technology gadgets in spy thrillers or as fear-instilling instruments of state or corporate surveillance in speculative fiction. Now, as biometric technologies appear poised for broader use, increased concerns about national security and the tracking of individuals as they cross borders have caused passports, visas, and border-crossing records to be linked to biometric data. A focus on fighting insurgencies and terrorism has led to the military deployment of biometric tools to enable recognition of individuals as friend or foe. Commercially, finger-imaging sensors, whose cost and physical size have been reduced, now appear on many laptop personal computers, handheld devices, mobile phones, and other consumer devices. *Biometric Recognition: Challenges and Opportunities* addresses the issues surrounding broader implementation of this technology, making two main points: first, biometric recognition systems are incredibly complex, and need to be addressed as such. Second, biometric recognition is an inherently probabilistic endeavor. Consequently, even when the technology and the system in which it is embedded are behaving as designed, there is inevitable uncertainty and risk of error. This book elaborates on these themes in detail to provide policy makers, developers, and researchers a comprehensive assessment of biometric recognition that examines current capabilities, future possibilities, and the role of government in technology and system development.

**Palm of the Rainforest Jun 24 2022 I know who I am Kelvin seemed desperate to win his father's approval. However, Mr Eze not only seemed unwilling to bestow it, but hell bent in making life unbearable for his acclaimed son. Kelvin thought it would be best to find his true family rather than endure the torture of being the unwanted child. He realised that his quest for recognition was unlikely to succeed, so he set his eyes on freedom. In the meantime, Kelvin expected that a good academic performance would change his luck and put him right with Mr Eze or at least boost his confidence in his abilities. With all his attention on his studies, competing for the best grades against the leading brains in his class, especially Christian, an indomitable rival, he would not let school romance get in the way fo his goal. But slowly and steadily, Chioma, gained his trust and won him over. He would have to make a decision between holding on to his moral principle or satisfying his human desire for friendship. New Home, New Identity Marginalised and decimated, the Biafran people were forced to go to war and secede from Nigeria. But decades after losing the war and embracing the Nigerian identity, they are still not treated as equal citizens in their home country. As a new wave of terrorism sweeps the northern parts of the country, the Biafran people, predominantly Igbo are again decimated as they have been for decades in every crises and this led to renewed discussions about their independence. For Biafra, the fight for equality was over and their Sovereignty was not negotiable. For Kelvin, it wasn't very different, and so his quest for truth and independence must begin. His compulsory holiday in Igbo land would expose him to the truth that might have indirectly caused him to abandon his academic pursuit. Perhaps, it was just an excuse to free himself from the clutch of Mr Eze and begin his quest for the truth about his identity.**
