**Maimonides' Hidden Torah Commentary -- Volume 5 - Deuteronomy** Mar 18 2022 The epitaph on Maimonides's tombstone reads, "From Moses (the prophet) to Moses, there was none like Moses (Maimonides)." The name, "Moses Maimonides" (1138-1204) is an acronym for his Hebraic name Moses ben Maimon. For centuries, yeshiva scholars and students alike affectionately refer to him by the epithet, "the Rambam." Just as the original Moses became the founder of the religion of ancient Israel, Moses Maimonides redefined Judaism for the future generations-more so than any other Judaic thinker or Halakhic scholar who came before or after him. Modern Judaism owes its conceptual and legal foundations to this remarkable thinker. This remarkable person occupies a rare position in the annals of Jewish history and is widely considered as one of the greatest Jewish thinkers and philosophers who ever lived, Maimonides stature reached almost mythic proportions. Jews of all modern religious persuasions-from the ultra-liberal to the Haredi branches of Orthodoxy each claim Maimonides as their patron hero. Both Christian and Islamic thinkers held Maimonides (who refer to him as Musa ibn Maymun in Arabic writings) in high regard. \_\_ I have been impressed with the writings of Rabbi Michael Leo Samuel ever since I read his first book on Philo. I enjoyed the comprehensive nature of his writings and the many insights in his books. I liked that he described Philo's views in an easy to read manner and compared Philo views with those of many ancient and modern writers. Since that time, I wrote six reviews of his Philo books and praised them all. There is much in them that will interest and teach both scholars and readers who had no idea beforehand about this first century philosopher, or just a little information about him. Reading Rabbi Samuel's books will introduce readers to a large number of Philo ideas, those of other thinkers on the ideas, including the Talmuds and Midrashim, and about philosophy and Judaism generally. Thus, when Rabbi Samuel asked me to write the Foreword to his first book on Maimonides, I was very pleased to accept his offer, both out of respect for his scholarship and because I wrote many books and articles on Maimonides myself. - Rabbi Dr. Israel Drazin \_\_ Rabbi Michael Leo

[Japanese War Crimes and Related Topics: A Guide to Records at the National Archives](#) Aug 23 2022 This finding aid will help researchers interested in Japanese war crimes, war criminals, and war crimes trials to navigate the vast holdings of the U.S. National Archives and Records Administration at College Park

(NARA). It will also be useful to anyone interested in military, intelligence, political, diplomatic, economic, financial, social, and cultural activities in the Far East during 1931-1951, as well as to those searching for information regarding Allied prisoners of war; the organization, functions, and activities of American and Allied agencies; and the Japanese occupation of countries and the American occupation of Japan. While not aimed at researchers interested in the strategic and tactical military and naval history of the war in the Far East, this finding aid may nevertheless be useful to those with such interests, if only to identify record groups and series of records that may bear on those topics. This finding aid covers records from over twenty record groups and includes materials declassified under the Japanese Imperial Government Disclosure Act of 2000 (P.L. 106-567) as well as records that were never classified and those declassified before the passage of the Disclosure Act. Because the process of identifying, declassifying, accessioning, and processing of records under the Act is taking place as this finding is being compiled, late arriving records may not be identified in this finding aid. Researchers should consult the IWG Web site (<http://www.archives.gov/iwg/>) for a complete and up-to-date list of records declassified under the Japanese Imperial Government Disclosure Act. Federal agencies involved in the identification and declassification of relevant classified records ascertained that there were relatively few pertinent records that were still classified. Most relevant records were either never classified or were declassified decades before the Act and were already in NARA's custody. While this finding aid's coverage is broad, it is not comprehensive. Researchers may find other relevant series of records within the record groups mentioned or not mentioned. Researchers are encouraged to use other finding aids and consult with NARA staff to locate records of interest. In addition, the National Archives at College Park holds nontextual records (such as still photographs and motion pictures) that researchers may want to examine. Other NARA facilities hold many records and donated material related to World War II, including records related to the subjects covered in this finding aid. This is particularly true of the Franklin D. Roosevelt, the Harry S. Truman, and the Dwight D. Think of archives as vast mountain ranges of records with the archivists guiding the expeditions. Explorations on familiar, well-trodden paths produce new perspectives when examined with fresh eyes and imagination.

**The 100 Best Astrophotography Targets** Jan 24 2020 Any amateur astronomer who is interested in astrophotography, particularly if just getting started, needs to know what objects are best for imaging in each month of the year. These are not necessarily the same objects that are the most spectacular or intriguing visually. The camera reveals different things and has different requirements. What objects in the sky tonight are large enough, bright enough, and high enough to be photographed? This book reveals, for each month of the year, the choicest celestial treasures within the reach of a commercial CCD camera. Helpful hints and advice on framing, exposures, and filters are included. Each deep sky object is explained in beautiful detail, so that observers will gain a richer understanding of these astronomical objects. This is not a book that dwells on the technology of CCD, Webcam, wet, or other types of astrophotography. Neither is it a book about in-depth computer processing of the images (although this topic is included). Detailed discussions of these topics can be found in other publications. This book focuses on what northern latitude objects to image at any given time of the year to get the most spectacular results.

*A Desktop Guide for Nonprofit Directors, Officers, and Advisors* Sep 24 2022 How to keep any nonprofit out of trouble, running smoothly, and accomplishing its mission "Jack Siegel--lawyer, accountant, management consultant, and computer whiz--takes the putative director or officer of a nonprofit organization on a useful and often entertaining voyage throughout the realm of the tax-exempt organizations universe, pointing out its quirks, foibles, and legal liabilities along the way. His handbook will make mandatory--and arresting--reading for those who are already serving as trustees, directors, officers, and key employees of exempt organizations, particularly charitable ones. Siegel's goal, in which he succeeds, is to help directors and officers of nonprofit organizations 'make better decisions.' The book is full of large policy analyses and paragraphs on the details, such as board size, board committees, board meeting formats, the contents of minutes, and the duties of officers. Salted with some excellent real-life examples, what also sets this book apart from most in its genre is the tone: the writing style, the brusqueness, the bluntness. He complains that too many directors 'check their good judgment at the boardroom door.' He advises individuals who 'desire agreement and demand adulation' to stay off boards; he insists on 'commitment' and 'institutional tension' with the executive director. He warns prospective directors that some organizations want, in addition to time and judgment, 'either your money or your ability to raise money.' To my delight, he extols the virtues of 'some level of expenditures' for qualified lawyers and accountants. Please join me in adding this most helpful handbook to your nonprofit library." --Bruce R. Hopkins, Attorney at Law, author of *The Law of Tax-Exempt Organizations*, Eighth Edition and *Starting and Managing a Nonprofit Organization: A Legal Guide*, Fourth Edition
