Microsoft Vista for IT Security Professionals Mar 09 2021 Microsoft Vista for IT Security Professionals is designed for the professional system administrators who need to securely deploy Microsoft Vista in their networks. Readers will not only learn about the new security features of Vista, but they will learn how to safely integrate Vista with their existing wired and wireless network infrastructure and safely deploy with their existing applications and databases. The book begins with

a discussion of Microsoft's Trustworthy Computing Initiative and Vista's development cycle, which was like none other in Microsoft's history. Expert authors will separate the hype from the reality of Vista's preparedness to withstand the 24 x 7 attacks it will face from malicious attackers as the world's #1 desktop operating system. Microsoft Windows operating systems run more than 90% of the desktop PCs in the world and Vista is the first major Windows release in more than 5 years This is currently the only book on Windows Vista Security

The Protected Vista Mar 29 2020 The Protected Vista draws a historical lineage from the eighteenth-century picturesque to present-day planning policy, highlighting how the values embedded within familiar views have developed over time through appropriation by diverse groups for cultural and political purposes. The book examines the intellectual construction of the protected vista, questioning the values entrenched within the view, by whom, and how they are observed and disseminated, to reveal how these views have been, and continue to be, part of a changing historical and political narrative. With a deeper knowledge and understanding of the shifting values in urban views, we will be better equipped to make decisions surrounding their protection in our urban centres. The book identifies the origins of current view protection policy in the aesthetic convention of the picturesque, drawing on a range of illustrated examples in the UK, the US, Australia, Canada and South Africa, to serve as a useful reference for students, researchers and academics in architecture, architectural conservation, landscape and urban planning.
