Character, Ethics and Economics Oct 03 2020 This book is an examination of the concept of 'character' as a moral marker in the later nineteenth and early twentieth centuries. Its main purpose is to investigate how the 'character talk' that helped to shape elite Britons' sense of themselves was used at this time to convince audiences, both in Britain and in the places they had conquered, that empire could be morally as well as materially justified and was a great force for good in the world. A small group of radical thinkers questioned many of the arguments of the imperialists but found it difficult to escape entirely from the sense of moral superiority that marked the latter's language.

Establishing Creative Writing Studies as an Academic

Discipline Aug 21 2019 This book advances creative writing studies as a developing field of inquiry, scholarship, and research. It discusses the practice of creative writing studies, the establishment of a body of professional knowledge, and the goals and future direction of the discipline within the academy. This book also traces the development of creative writing studies; noting that as the new discipline matures—as it refers to evidence of its own research methodology and collective data, and locates its authority in its own scholarship—creative writing studies will bring even more meaning to the academy, its profession, and its student body.

The Mark of Cain Sep 21 2019 1567 Aphra is not a normal child. Found abandoned as a baby among the reeds and rushes, the two outcast witches who raise her in their isolated cottage are never sure if she was born, or just pushed up through the foul, black mud for them to find. Little Aphra's gifts in the dark craft are clear, even as an infant, but soon even her guardians begin to fear her. When a violent fire destroys their home, Aphra is left to fend for herself. Years of begging and stealing make her strong, but they also make her bitter, for she is shunned and feared by everyone she meets. Until she reaches Bryers Guerdon

British Imperialism Mar 28 2020 A milestone in the understanding of British history and imperialism, and truly global in its reach, this magisterial account received numerous accolades from reviewers in its first edition. The first to coin the phrase "gentlemanly capitalism", Cain and Hopkins make the strong and provocative argument that it is impossible to understand the nature and evolution of British imperialism without taking account of the peculiarities of her economic development. In particular, the growth of the financial sector - and above all, the City of London - played a crucial role in shaping the course of British history and Britain's relations overseas. Now with a substantive new introduction and a conclusion, the scope of the original account has been widened to include an innovative discussion of globalization.

British Imperialism Jul 24 2022 A milestone in the understanding of British history and imperialism, this groundbreaking book radically reinterprets the course of modern economic development and the causes of overseas expansion during the past three centuries. Employing their concept of 'gentlemanly capitalism', the authors draw imperial and domestic British history together to show how the shape of the nation and its economy depended on international and imperial ties, and how these ties were undone to produce the post-colonial world of today. Containing a significantly expanded and updated Foreword and Afterword, this third edition assesses the development of the debate since the book's original publication, discusses the imperial era in the context of the controversy over globalization, and shows how the study of the age of empires remains relevant to understanding the post-colonial world. On Film Dec 25 2019 In this significantly expanded new edition of his acclaimed exploration of the four Alien movies, Stephen Mulhall adds several new chapters on Steven Spielberg's Mission: Impossible trilogy and Minority Report. The first part of the book discusses the four Alien movies. Mulhall argues that the sexual significance of the aliens themselves, and of Ripley's resistance to them, takes us deep into the question of what it is to be human. At the heart of the book is a highly original and controversial argument that films themselves can philosophize. Mulhall then applies his interpretative model to another sequence of contemporary Hollywood movies: the Mission: Impossible series. A brand new chapter is devoted to each of the three films in the series, and to other films by the relevant directors.
