California May 10 2021 “A California classic . . . California, it should be remembered, was very much the wild west, having to wait until 1850 before it could force its way into statehood. so what tamed it? Mr. Starr’s answer is a combination of great men, great ideas and great projects.”—The Economist From the age of exploration to the age of Arnold, the Golden State’s premier historian distills the entire sweep of California’s history into one splendid volume. Kevin Starr covers it all: Spain’s conquest of the native peoples of California in the early sixteenth century and the chain of missions that helped that country exert control over the upper part of the territory; the discovery of gold in January 1848; the incredible wealth of the Big Four railroad tycoons; the devastating San Francisco earthquake of 1906; the emergence of Hollywood as the world’s entertainment capital and of Silicon Valley as the center of high-tech research and development; the role of labor, both organized and migrant, in key industries from agriculture to aerospace. In a rapid-fire

epic of discovery, innovation, catastrophe, and triumph, Starr gathers together everything that is most important, most fascinating, and most revealing about our greatest state. Praise for California “[A] fast-paced and wide-ranging history . . . [Starr] accomplishes the feat with skill, grace and verve.”—Los Angeles Times Book Review “Kevin Starr is one of California’s greatest historians, and California is an invaluable contribution to our state’s record and lore.”—Marla Shriver, journalist and former First Lady of California “A breeze to read.”—San Francisco

**California School Law** May 22 2022 Now in its second edition, California School Law is the only comprehensive source discussing how federal and state law affects the day-to-day operation of the state's traditional public, charter, and private schools. While the book is comprehensive, the authors have written it for a broad audience. California School Law has become a coveted desk-top reference for administrators, governing board members, school attorneys, union leaders, and policymakers. It also has been widely adopted as a classroom textbook in educational administration and education law classes. In commenting on the first edition, Michael Kirst, Stanford University Education Professor-Emeritus, noted that "The writing style is a blend of law and policy that is easy to follow." Other reviews that greeted the first edition are available on this website. The first chapter provides an explanation of the legal framework within which California schooling takes place and key players at the state, district, and school level. Ensuing chapters examine student attendance and truancy, curriculum law, employment law, teacher and student rights of expression, the school and religion, students with disabilities, student discipline, privacy and search and seizure, and legal liability in both state and federal court. Also included are chapters on unions and collective bargaining, educational finance issues, and racial and gender discrimination. Appendices provide a glossary of legal terminology, an explanation of how to find and read legislative enactments and judicial decisions, and a list of sources for accessing law. The book's table of contents is included on this website. Also included are links two sections from the second edition, one dealing with the discipline of students with disabilities and the other with student rights of expression. Law never stands still. To keep the book current, the authors will maintain a cumulative update for the second edition on this website.

The California Field Atlas Jun 18 2019 "[A] gorgeously illustrated compendium."--Sunset

This lavishly illustrated atlas takes readers off the beaten path and outside normal conceptions of California, revealing its myriad ecologies, topographies, and histories in exquisite maps and trail paintings. Based on decades of exploring the backcountry of the Golden State, artist-adventurer Obi Kaufmann blends science and art to illuminate the multifaceted array of living, connected systems like no book has done before. Kaufmann depicts layer after layer of the natural world, delighting in the grand scale and details alike. The effect is staggeringly beautiful: presented alongside California divided into its fifty-eight counties, for example, we consider California made up of dancing tectonic plates, of watersheds, of wildflower gardens. Maps are enhanced by spirited illustrations of wildlife, keys that explain natural phenomena, and a clear-sighted but reverential text. Full of character and color, a bit larger than life, *The California Field Atlas* is the ultimate road trip companion and love letter to a place.

Assembling California Dec 17 2021 At various times in a span of fifteen years, John McPhee made geological field surveys in the company of Eldridge Moores, a tectonicist at the University of California at Davis. The result of these trips is *Assembling California*, a cross-section in human and geologic time, from Donner Pass in the Sierra Nevada through the golden foothills of the Mother Lode and across the Great Central Valley to the wine country of the Coast Ranges, the rock of San Francisco, and the San Andreas family of faults. The two disparate time scales occasionally intersect—in the gold disruptions of the nineteenth century no less than in the earthquakes of the twentieth—and always with relevance to a newly understood geologic history in which half a dozen large and separate pieces of country are seen to have drifted in from far and near to coalesce as California. McPhee and Moores also journeyed to remote mountains of Arizona and to Cyprus and northern Greece, where rock of the deep-ocean floor has been transported into continental settings, as it has in California. Global in scope and a delight to read, *Assembling California* is a sweeping narrative of maps in motion, of evolving and dissolving lands.

**Not So Golden After All** Sep 02 2020 Quality public education, modern highway systems, and reasonably priced housing—these are just some of the qualities that once made California one of the most desirable places to live. Just a few decades later, the state finds itself with an education system that is failing its citizens, one of the highest unemployment rates in the nation, and a quickly evaporating dream of home ownership. Illustrating each step of the breakdown that led to its current state of dysfunction, *Not So Golden After All: The Rise and Fall of California* provides insight into a system gone amuck. It addresses complicated topics in an engaging manner to help the public and leaders alike understand how to make policies that balance expectations with outcomes. Key political themes covered include disconnected institutions, perpetually unbalanced budgets, immigration, voter ignorance, interest group influence, and dysfunctional institutions. Investigating the gridlock that has become all too common within the state's legislature, the book: Demonstrates the impact of the state's inability to generate sufficient revenue, particularly for public education and an under-trained workforce Highlights the problems created by poor land use planning —from suburban sprawl and government waste to inefficient use of agricultural land Examines how interest groups have been able to wrest control of the processes that were created to keep them in line Identifies the duplication of efforts and other inefficiencies at the state and local levels Author Larry Gerston leaves no stone unturned in his discussion of California's economy, position on the Pacific Rim, cultural diversity, land and water issues, and its relationship with the federal government. He examines the state's infrastructure, natural resources, immigration issues, education, finance, healthcare, civil rights, planning and development, security, laws, political parties, and power structures to provide civic leaders and policy makers with the understanding

required to restore the sheen to this once glistening paradise. The Contra Costa Times discussed Larry Gerston's recent Commonwealth Club lecture in a May 17, 2012 article. Read an interview with Larry Gerston in The Mercury News.
