the world's premier high-tech companies This is the inside story of Hewlett-Packard Company's struggle to regain its former glory, and of the high-stakes battle between CEO Carly Fiorina and family scion Walter Hewlett over how best to achieve that goal. For decades, HP was admired not only for its innovative products and soaring stock price, but for its egalitarian corporate culture and father-knows-best integrity.

Backfire explains how the company fell on hard times, recounts the historic decision that made Fiorina the world's top-ranking female executive, and brings to life the

backlash that resulted when she tried to impose her charismatic salesmanship on the aging icon. Top BusinessWeek journalist Peter Burrows gives the dramatic blow-by-blow of Hewlett's effort to kill Fiorina's most controversial move of all, her \$19 billion purchase of rival Compaq Computer. Fiorina won by a whisker, after the most expensive proxy fight in history and a dramatic lawsuit that accused the company of illegally fixing the vote. This gripping, ongoing story includes fascinating personalities and dramatic boardroom and courtroom drama.

In addition to reviewed submissions, the program also included contributions to the doctoral symposium held during NLDB2009 as well as two invited talks. The set also covered some of the currently hot

topics in the use of natural language for accessing information systems.

We received 51 submissions as regular papers for the main conference, 2 extra submissions as posters, and 3 short papers for the doctoral symposium. Each paper for the main conference was assigned four reviewers, taking into account preferences expressed by the Program Committee members as much as possible. Within the review deadline, we received at least three reviews for almost all submissions. After the review deadline, the Conference

This task included studying the reviews and the papers, specifically those whose assessment made them borderline cases, and discussing conflicting opinions and their impact on the assessment to find individual papers. Finally, the meta-reviewers wrote additional reviews for the few papers which received less than three reviews, as well as for papers which received reviews with considerably conflicting assessments.
