Financial Microeconometrics Apr 26 2020 This book explores new topics in modern research on empirical corporate finance and applied accounting, especially the econometric analysis of microdata. Dubbed “financial microeconometrics” by the author, this concept unites both methodological and applied approaches. The book examines how quantitative methods can be applied in corporate finance and accounting research in order to predict companies getting into financial distress. Presented in a clear and straightforward manner, it also suggests methods for linking corporate governance to financial performance, and discusses what the determinants of accounting disclosures are. Exploring these questions by way of numerous practical examples, this book is intended for researchers, practitioners and students who are not yet familiar with the variety of approaches available for data analysis and microeconometrics. “This book on financial microeconometrics is an excellent starting point for research in corporate finance and accounting. In my view, the text is positioned between a narrative and a scientific treatise. It is based on a vast amount of literature but is not overloaded with formulae. My appreciation of financial microeconometrics has very much increased. The book is well organized and properly written. I enjoyed reading it.” Wolfgang Marty, Senior Investment Strategist, AgaNola AG

Macroeconomics, Theories and Policies Jul 30 2020 This book traces the history of macroeconomics, the evolution of macroeconomic thought, and the resulting theory and policy. The book places the various macroeconomic theories in the order in which they developed chronologically, and illustrates the similarities and differences of the models. Starting with classical economics and the Keynesian revolution, this book explores the macroeconomic theory after Keynes, open economy macroeconomics, economic policy, and sectoral functions. Financial officers and professionals making pecuniary decisions and analyses.

Machine Learning for Asset Managers Mar 26 2020 Successful investment strategies are specific implementations of general theories. An investment strategy that lacks a theoretical justification is likely to be false. Hence, an asset manager should concentrate her efforts on developing a theory rather than on backtesting potential trading rules. The purpose of this Element is to introduce machine learning (ML) tools that can help asset managers discover economic and financial theories. ML is not a black box, and it does not necessarily overfit. ML tools complement rather than replace the classical statistical methods. Some of ML's strengths include (1) a focus on out-of-sample predictability over variance adjudication; (2) the use of computational methods to avoid relying on (potentially unrealistic) assumptions; (3) the ability to "learn" complex specifications, including nonlinear, hierarchical, and noncontinuous interaction effects in a high-dimensional space; and (4) the ability to disentangle the variable search from the specification search, robust to multicollinearity and other substitution effects.

The Morality of Defensive War Feb 17 2022 International law and conventional morality grant that states may stand ready to defend their borders with lethal force. But what grounds the permission to kill for the sake of political sovereignty and territorial integrity? In this book leading theorists address this vexed issue, and set the terms of future debate over national defence.

Anton's Calculus Early Transcendentals Nov 21 2019 Anton's Calculus, Early Transcendentals strives to increase student comprehension and conceptual understanding through a balance between rigor and clarity of explanations, sound mathematics, and excellent exercises, applications, and examples. Anton pedagogically approaches Calculus through the Rule of Four, presenting concepts from the verbal, algebraic, visual, and numerical points of view.

Public Financial Management and Its Emerging Architecture Jun 09 2021 The first two decades of the twenty-first century have witnessed an influx of innovations and reforms in public financial management. The current wave of reforms is markedly different from those in the past, owing to the sheer number of innovations, their widespread adoption, and the sense that they add up to a fundamental change in the way governments manage public money. This book takes stock of the most important innovations that have emerged over the past two decades, including fiscal responsibility legislation, fiscal rules, medium-term budget frameworks, fiscal councils, fiscal risk management techniques, performance budgeting, and accrual reporting and accounting. Not merely a handbook or manual describing practices in the field, the volume instead poses critical questions about innovations; the issues and challenges that have appeared along the way, including those associated with the global economic crisis; and how the ground can be prepared for the next generation of public financial management reforms. Fundamentals of Financial Accounting Apr 07 2021

Nine Steps to Financial Freedom Feb 23 2020 The best-selling author of *The Courage to Be Rich* and *You've Earned It, Don't Lose It* shows readers how to obtain control over their money through changing their spending habits; how to understand investments, retirement, insurance, and credit; and how to gain true financial freedom. Reprint. 250,000 first printing.

Sparing Civilians Nov 14 2021 Killing civilians is worse than killing soldiers. Few moral principles have been more widely and viscerally affirmed. But in recent years it has faced a rising tide of dissent. Seth Lazar turns this tide and vindicates international law. He develops new insights into the morality of harm, relevant to everyone interested in the debate.

Commodities Oct 01 2020 *Commodities: Markets, Performance, and Strategies* provides a comprehensive view of commodity markets by describing and analyzing historical commodity performance, vehicles for investing in commodities, portfolio strategies, and current topics. It begins with the basics of commodity markets and various investment vehicles. The book then highlights the unique risk and return profiles of commodity investments, along with the dangers from mismanaged risk practices. The book also provides important insights into recent developments, including high frequency trading, financialization, and the emergence of virtual currencies as commodities. Readers of *Commodities: Markets, Performance, and Strategies* can gain an in-depth understanding about the multiple dimensions of commodity investing from experts from around the world. Commodity markets can be accessed with products that create unique risk and return dynamics for investors worldwide. The authors provide insights in a range of areas, from the economics of supply and demand for individual physical commodities through the financial products used to gain exposure to commodities. The book balances useful practical advice on commodity exposure while exposing the reader to various pitfalls inherent in these markets. Readers interested in a basic understanding will benefit as will those looking for more in-depth presentations of specific areas within commodity markets. Overall, *Commodities: Markets, Performance, and Strategies* provides a fresh look at the myriad dimensions of investing in these globally important markets.

Accounting and Finance for Non-accountants Aug 23 2022

The Routledge Companion to Accounting in Emerging Economies Oct 13 2021 As researchers reveal the increasing complexities of accounting practices in emerging economies, there is a growing need for an overview of the topic. *The Routledge Companion to Accounting in Emerging Economies* is a prestige work offering an introduction to current scholarship in the field, with indications of future directions for enhancing the contribution to knowledge. With regional coverage of key emerging economies such as Brazil, Russia, India and China, the team of contributors analyse issues in accounting in detail, while shedding light on the role of the accounting profession in providing accountability and governance across the developing world. Each chapter is headed up by an internationally recognised author who is a leading expert in designing and implementing research approaches to the topic. Within the team of authors, some are experienced senior contributors while others are developing new avenues of exploration on the basis of high-quality doctoral study. This range of author experience has been deliberately chosen to allow the reader to envisage working in such a team while growing in confidence. This unique reference offers a comprehensive guide to advanced students, academics, practitioners and policy makers on the current state of, and potential developments in, accounting in developing economies globally. This work will be of particular interest to students and researchers looking to identify topics in emerging economies, academics and practitioners seeking convenient access to an unfamiliar area, and established researchers seeking a single repository on the current state of knowledge, current debates and relevant literature.

Financial Reporting Standards for Malaysia Oct 25 2022

Financial Accounting Jun 21 2022 Accounting is the provision of financial information to managers or owners, as well as to external users, so that they can make business decisions. It measures, monitors and controls business activities. *Financial Accounting* provides a very accessible and easy-to-follow introduction to accounting. It introduces students to accounting and provides them with a clear understanding of the theory and practice of financial accounting. The text blends theory and practice by stressing the underlying concepts and context of accounting. Text thoroughly updated to include examples that comply with the new format adopted by International Accounting Standards for listed companies. 'Real Life Nuggets' and other material from the business press will be revised and updated. A large number of end of chapter questions of escalating difficulty, together with the accompanying answers, enables the reader to develop their understanding of the key concepts discussed in the text.

Financial Reporting & Analysis Feb 05 2021 Using real-world examples to thoroughly involves readers with financial statements, Financial Reporting and Analysis, 9e builds skills in analyzing real financial reports through statements, exhibits, and cases of actual companies. Emphasis is placed on the analysis and interpretation of the end result of financial reporting – financial statements.

Accounting Theory and Practice in the Malaysian Context (UUM Press) Dec 15 2021 The main objective of this book is to facilitate the students to understand the underlying regulatory process of financial accounting reporting, companies' manager behaviour when preparing their financial reports, corporate governance and theories applicable to accounting practice explaining the circumstances given in the current phenomenon. The content of this book provides a useful insight to it readers about the development of accounting system in Malaysia, the conceptual framework that underpinned accounting practice particularly the regulatory and professional bodies, the general theories underlying the current practice of accounting reporting, standards and practice, and contemporary issues in financial accounting reporting such as measurements, sustainability reporting and digitisation reporting.

The Case against Education Jun 16 2019 Why we need to stop wasting public funds on education Despite being immensely popular—and immensely lucrative—education is grossly overrated. Now with a new afterword by Bryan Caplan, this explosive book argues that the primary function of education is not to enhance students' skills but to signal the qualities of a good employee. Learn why students hunt for easy As only to forget most of what they learn after the final exam, why decades of growing access to education have not resulted in better jobs for average workers, how employers reward workers for costly schooling they rarely ever use, and why cutting education spending is the best remedy. Romantic notions about education being "good for the soul" must yield to careful research and common sense—The Case against Education points the way.

The American Jewish Times Outlook [serial]; 1983-1984 Sep 12 2021 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Foundations of Finance May 28 2020

A History of Canadian Accounting Thought and Practice Nov 02 2020 This book, first published in 1993, focuses on the evolution of accounting institutions, practices and standard-setting in Canada. Canada's federal system complicates the jurisdictional authority for accounting matters. The Canadian constitution empowers the ten provinces to regulate the training and certification of accountants, and each can incorporate organizations. A great deal of effort has been made by accounting bodies on jurisdictional coordination and disputes, and this book analyses how these systems have come to function in their present form.

Financial Accounting and Reporting in Malaysia Jul 22 2022

The Ethics of War Oct 21 2019 Just War theory - as it was developed by the Catholic theologians of medieval Europe and the jurists of the Renaissance - is a framework for the moral and legal evaluation of armed conflicts. To this day, Just War theory informs the judgments of ethicists, government officials, international lawyers, religious scholars, news coverage, and perhaps most importantly, the public as a whole. The influence of Just War theory is as vast as it is subtle - we have been socialized into evaluating wars largely according to the principles of this medieval theory, which, according to the eminent philosopher David Rodin, is "one of the few basic fixtures of medieval philosophy to remain substantially unchallenged in the modern world". Some of the most basic assumptions of Just War Theory have been dismantled in a barrage of criticism and analysis in the first dozen years of the 21st century. "The Ethics of War" continues and pushes past this trend. This anthology is an authoritative treatment of the ethics and law of war by both the eminent scholars who first challenged the orthodoxy of Just War theory, as well as by new thinkers. The twelve original essays span both foundational and topical issues in the ethics of war, including an investigation of: whether there is a "greater-good" obligation that parallels the canonical lesser-evil justification in war; the conditions under which citizens can wage war against their own government; whether there is a limit to the number of combatants on the unjust side who can be permissibly killed; whether the justice of the cause for which combatants fight affects the moral permissibility of fighting; whether duress ever

justifies killing in war; the role that collective liability plays in the ethics of war; whether targeted killing is morally and legally permissible; the morality of legal prohibitions on the use of indiscriminate weapons; the justification for the legal distinction between directly and indirectly harming civilians; whether human rights of unjust combatants are more prohibitive than have been thought; the moral repair of combatants suffering from PTSD; and the moral categories and criteria needed to understand the proper justification for ending war.

Environmental Engineering Apr 19 2022

RETRACTED BOOK: 151 Trading Strategies Aug 11 2021 The book provides detailed descriptions, including more than 550 mathematical formulas, for more than 150 trading strategies across a host of asset classes and trading styles. These include stocks, options, fixed income, futures, ETFs, indexes, commodities, foreign exchange, convertibles, structured assets, volatility, real estate, distressed assets, cash, cryptocurrencies, weather, energy, inflation, global macro, infrastructure, and tax arbitrage. Some strategies are based on machine learning algorithms such as artificial neural networks, Bayes, and k-nearest neighbors. The book also includes source code for illustrating out-of-sample backtesting, around 2,000 bibliographic references, and more than 900 glossary, acronym and math definitions. The presentation is intended to be descriptive and pedagogical and of particular interest to finance practitioners, traders, researchers, academics, and business school and finance program students.

The Oxford Handbook of Ethics of War Mar 06 2021 Recent years have seen a resurgence of interest, among both philosophers, legal scholars, and military experts, on the ethics of war. Due in part due to post 9/11 events, this resurgence is also due to a growing theoretical sophistication among scholars in this area. Recently there has been very influential work published on the justification of killing in self-defense and war, and the topic of the ethics of war is now more important than ever as a discrete field. The 28 commissioned chapters in this Handbook will present a comprehensive overview of the field as well as make significant and novel contributions, and collectively they will set the terms of the debate for the next decade. Lazar and Frowe will invite the leading scholars in the field to write on topics that are new to them, making the volume a compilation of fresh ideas rather than a rehash of earlier work. The volume will be divided into five sections: Method, History, Resort, Conduct, and Aftermath. The contributors will be a mix of junior and senior figures, and will include well known scholars like Michael Walzer, Jeff McMahan, and David Rodin.

Reauthorization of the Community Development Banking and Financial Institutions Act of 1994 Jul 10 2021

The Last Tycoons Jan 24 2020 They amassed unimaginable fortunes and would stop at nothing to make a deal, until their titanic egos started to jeopardize everything. This is the astonishing story of Lazard Frères, the world's most elite and legendary investment bank – and the men who reigned over it all. For over 150 years Lazard Frères had stood apart from other Wall Street firms by offering ultra-wealthy clients the wisdom of its 'Great Men': from Felix Rohatyn, the escapee from Nazi-occupied France turned financial genius, to Michel David-Weill, the inscrutable French billionaire 'Sun King'; from Steve Rattner, the boy wonder from Long Island who clashed violently with the old guard, to larger-than-life CEO Bruce Wasserstein, 'Bid-Em-Up Bruce', who broke with the bank's traditions and made himself billions in the process. In *The Last Tycoons* William Cohan, himself a former high-level Wall Street banker, takes us into their mysterious and secretive world, telling a story of ruthless ambition, whispered advice, explosive feuds, glamorous mistresses, decadent excesses and unimaginable wealth.

Proceedings of the Regional Conference on Science, Technology and Social Sciences (RCSTSS 2016) May 20 2022 This book features papers addressing a broad range of topics including psychology, religious studies, natural heritage, accounting, business, communication, education and sustainable development. It serves as a platform for disseminating research findings by academicians of local, regional and global prominence, and acts as a catalyst to inspire positive innovations in the development of the region. It is also a significant point of reference for academicians and students. This collection of selected social sciences papers is based on the theme "Soaring Towards Research Excellence", presented at the Regional Conference of Sciences, Technology and Social Sciences (RCSTSS 2016), organised bi-annually by Universiti Teknologi MARA Cawangan Pahang, Malaysia.

Financial Accounting and Reporting Mar 18 2022 Financial Accounting and Reporting is the most up to date text on the market. Now fully updated in its fourteenth edition, it includes extensive coverage of International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS). This market-leading text offers students a clear, well-structured and comprehensive treatment of the subject. Supported by illustrations and exercises, the book provides a strong balance of theoretical and conceptual coverage. Students using this book will gain the knowledge and skills to help them apply current standards, and critically appraise the underlying concepts and financial reporting methods.
