*The Descendants of Cain* Jun 18 2019 Hwang Sun-won, perhaps the most beloved and respected Korean writer of the 20th century, based this extraordinary novel on his own experiences in his North Korean home village between the end of World War II and the eve of the Korean War when Korea had been divided into North and South by its two "liberators" - the United States and the Soviet Union. In this story the Soviet-backed communist party, using the promise of land reform, sets people at each other's throat. Portrayed here is an entire community caught in the political and social firestorm that brings out the selfishness, cruelty and ignorance of simple people, but also shows their loyalty and nobility. Compelling here, too, is a heroine who represents the "eternally feminine" for all Korean men, and the setting, the harsh political, psychic and physical landscape of rural postwar North Korea rarely glimpsed by the outside world. Hwang Sun-won is an artist of consummate delicacy and subtlety, and his writing is marked by keen psychological insight and steely asceticism. While three collections of his short stories have appeared in Hong Kong and the West, "The Descendants of Cain" is the first English translation of a Hwang Sun-won novel.

**De-Bordering Korea** Jun 30 2020 As tensions remain on the Korean peninsula, this book looks back on the decade of improved inter-Korean relations and engagement between 1998 and 2008, now known as the 'Sunshine Policy' era. Moving beyond traditional economic and political perspectives, it explores how this decade of intensified cooperation both affected and reshaped existing physical, social and mental boundaries between the two Koreas, and how this 'de-bordering' and 're-bordering' has changed the respective attitudes towards the other. Based around three key themes, 'Space', 'People', and 'Representations', this book looks at the tangible and intangible areas of contact created by North-South engagement during the years of the Sunshine Policy. 'Space' focuses on the border regions and discusses how the border reflects the dynamics of multiple types of exchanges and connections between the two Koreas, as well as the new territorial structures these have created. 'People' addresses issues in human interactions and social organizations, looking at North Korean defectors in the South, shifting patterns of North-South competition in the 'Korean' diaspora of post-Soviet Central Asia, and the actual and physical presence of the Other in various social settings. Finally, 'Representations' analyses the image of the other Korea as it is produced, circulated, altered/falsified and received (or not) on either side of the Korean border. The contributors to this volume draw on a broad spectrum of disciplines ranging from geography, anthropology and archaeology, to media studies, history and sociology, in order to show how the division between North and South Korea functions as an essential matrix for geographical, social and psychological structures on both sides of the border. As such, this book will appeal to students and scholars from numerous fields of study, including Korean studies, Korean culture and society, and international relations more broadly.

*Key Indicators for Asia and the Pacific 2020* Jan 06 2021 The Key Indicators for Asia and the Pacific 2020, the 51st edition of this series, includes the latest available economic, financial, social, and environmental indicators for the 49 regional members of the Asian Development Bank. It presents the latest key statistics on development issues concerning the economies of Asia and the Pacific to a wide audience, including policy makers, development practitioners, government officials, researchers, students, and the general public. Part I of this issue presents the current status of economies of Asia and the Pacific with respect to the Sustainable Development Goals based on selected indicators from the global indicator framework. Part II comprises statistical indicators that capture economic, financial, social, and environmental developments. Part III presents key statistics and stylized facts on the phenomenon of global value chains.

*Sketches of Korea* Jul 12 2021 How Much Do You Think You Know about Korea? Get a glimpse of the many faces of Korea in illustration form Kimchi, K-pop, taekwondo, Samsung—the images that most people get when they think of Korea don't stray much beyond the usual ones. But there are so many more fascinating sides to Korea. A cultural anthropologist with over 20 years of personal experience in Korea, author Benjamin Joinau introduces readers to the various faces of Korea outside those that Koreans typically like to present, guided by Elodie Dornand de Rouville's refreshingly original and detailed illustrations—Korean society through the eyes of two foreigners. Grab a copy and let's take a look at the real faces of Korea, past and present.

**The Lean Startup** Apr 09 2021 Most startups fail. But many of those failures are preventable. The Lean Startup is a new approach being adopted across the globe, changing the way companies are built and new products are launched. Eric Ries defines a startup as an organization dedicated to creating something new under conditions of extreme uncertainty. This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom. What they have in common is a mission to penetrate that fog of uncertainty to discover a successful path to a sustainable business. The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively. Inspired by lessons from lean manufacturing, it relies on "validated learning," rapid scientific experimentation, as well as a number of counter-intuitive practices that shorten product development cycles, measure actual progress without resorting to vanity metrics, and learn what customers really want. It enables a company

to shift directions with agility, altering plans inch by inch, minute by minute. Rather than wasting time creating elaborate business plans, The Lean Startup offers entrepreneurs—in companies of all sizes—a way to test their vision continuously, to adapt and adjust before it's too late. Ries provides a scientific approach to creating and managing successful startups in a age when companies need to innovate more than ever.
