About Online Poker Jan 26 2020 This book is intended to be an introduction to the poker game, emphasizing on the online poker, the betting structure, poker variants, poker strategy and specific poker tournaments. Online poker is the game of poker played over the Internet. Online poker rooms tend to be viewed as more player-friendly and allow the players to play for very low stakes. It has been partly responsible for a dramatic increase in the number of poker players worldwide. While the practice of comping players with free meals, hotel rooms, and merchandise is quite common in B&M casinos, online poker rooms have needed to develop new ways to reward faithful customers. The most common way of doing this is through deposit bonuses, where the player is given a bonus code to enter when placing money into an account. One common feature of the online poker sites is to offer tournaments called satellites by which the winners gain entry to real-life poker tournaments. Online poker rooms reward customers through deposit bonuses, where the player is given a bonus code to enter when placing money into an account.

Interpretable Machine Learning Nov 04 2020 This book is about making machine learning models and their decisions interpretable. After exploring the concepts of interpretability, you will learn about simple, interpretable models such as decision trees, decision rules and linear regression. Later chapters focus on general model-agnostic methods for interpreting black box models like feature importance and accumulated local effects and explaining individual predictions with Shapley values and LIME. All interpretation methods are explained in depth and discussed critically. How do they work under the hood? What are their strengths and weaknesses? How can their outputs be interpreted? This book will enable you to select and correctly apply the interpretation method that is most suitable for your machine learning project.

Good Neighbors Sep 02 2020 The moral principles prescribed for friendship, civil society, and democratic public life apply imperfectly to life around home, where we interact day to day without the formal institutions, rules of conduct, and means of enforcement that guide us in other settings. This work explores how encounters among neighbours create a democracy of everyday life, which has been with us since the beginning of American history and is expressed in settler, immigrant, and suburban narratives and in novels, poetry, and popular culture.

Database Theory - ICDT'99 Jul 20 2019

Databases research is a field of computer science where theory meets application. Many concepts and methods, that were regarded as issues of theoretical interest when initially proposed, are now included in implemented database systems and related products. Examples abound in the fields of database design, query languages, query optimization, concurrency control, statistical databases, and many others. The papers contained in this volume were presented at ICDT'99, the 7th International Conference on Database Theory, in Jerusalem, Israel, January 10-12, 1999. ICDT is an international forum for research on the principles of database systems. It is a biennial conference, and has a tradition of being held in beautiful European sites: Rome in 1986, Bruges in 1988, Paris in 1990, Berlin in 1992, Prague in 1995, and Delphi in 1997. From 1992, ICDT has been merged with another series of conferences on theoretical aspects of database systems, The Symposium on Mathematical Fundamentals of Database Systems (MFDBS), that was initiated in Dresden (1987), and continued in Visegrad (1989) and Rostock (1991). ICDT aims to enhance the exchange of ideas and cooperation in database research both within unified Europe, and between Europe and the other continents. ICDT'99 was organized in cooperation with: ACM Special Interest Group on Management of Data (Sigmod) IEEE Israel Chapter ILA — The Israel Association for Information Processing EDBT Foundation ICDT'99 was sponsored by: The Hebrew University of Jerusalem Tel Aviv University Tandem Labs Israel, a Compaq Company This volume contains 26 technical papers selected from 89 submissions. *Online Teaching-Learning* Feb 25 2020

How to Love Your Neighbor Without Being Weird Dec 17 2021 "I want to love my neighbor, but I don't know how." Most of us feel guilty about Christ's command to love our neighbor, but let's be honest--we don't even know most of the people living around us. How can we love people we don't even know? Besides, doesn't it count as "loving our neighbor" when we send money to missionaries and put out yard signs for our church? Are we supposed to just knock on our neighbors' doors and tell them about Jesus? "They'll think I'm weird." *How to Love Your Neighbor Without Being Weird* helps you overcome fears about getting to know your neighbors and sharing your faith. You'll learn simple, practical ways to get to know your neighbors, using your God-given personality. As you venture out of the comfort of your living room and into the lives of your neighbors, you'll form authentic friendships, create a safer community, and find fulfillment in obeying Christ's #2 command. Loving your neighbor isn't a random command; it's God's perfect plan. "A very timely book for a very isolated culture. Amy Lively offers practical help and guidance in the neglected practice of hospitality."--Dr. Dennis Rainey, president, FamilyLife "This ministry is changing lives. Amy has followed God's leading into an untapped area of people that need Jesus. What a simple idea of reaching out to your neighborhood--the area that God placed you in for His purposes. Amy's ideas and excellent resources have offered a no-excuse zone for this ministry. The Lord said, 'Love me and love your neighbor.' He chose Amy to show us the way. Thank you for this amazing resource!"--Chrissy Dunham, director of women's ministry at Prestonwood Baptist Church, Plano, Texas "Amy knows God has given each of us a corner of the world to share the love of Jesus and the hope found in His Word. Her book equips women, spiritually and practically, to answer this call and open their hearts and homes to friends and neighbors."--Wendy Blight, Proverbs 31 Ministries speaker and author "Amy's brilliant approach to engaging our neighbors is natural, fun, and life-changing! She provides every single thing you will need, including courage. This book and practice is a must for everyone desiring to honor and obey the Lord."--Debbie Stuart, church and leadership development director, Women of Faith "Amy gives us the keys to really connect with those who live around us--not with an agenda, but with a heart toward real relationships. A must-read for anyone who believes that 'Love thy neighbor' really starts at your front door."--Kathi Lipp, coauthor of *The Cure for the Perfect Life* and author of *The Husband Project* "With hundreds of friends on social media, why are we so lonely? In her amazing book, Amy Lively identifies the heart-need for deep connection that's not being met through a screen and offers a simple solution: Actually meet the people who live near you. Amy's openness to share her successes and failures at reaching out will inspire you to try it yourself."--Glynnis Whitwer, author of *Everyday Confetti*; executive director of communications, Proverbs 31 Ministries "Amy shows us, step-by-step, how to conquer our fears, connect with our

Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. *Mastering the American Accent* is an easy-to-follow approach for reducing the accent of non-native speakers of English. Well-sequenced lessons in the book correspond over eight hours of audio files covering the entire text. The audio program provides clear models (both male and female) to help coach a standard American accent. The program is designed to help users speak Standard American English with clarity, confidence, and accuracy. The many exercises in the book concentrate on topics such as vowel sounds, problematic consonants such as V, W, TH, the American R and T and others. Correct lip and tongue positions for all sounds are discussed in detail. Beyond the production of sounds, the program provides detailed instruction in prosodic elements such as syllable stress, emphasis, intonation, linking words for smoother speech flow, common word contractions, and much more. Additional topics that often confuse ESL students are also discussed and explained. They include distinguishing between casual and formal speech, homophones (e.g., they're and there), recognizing words with silent letters (e.g., comb, receipt), and avoiding embarrassing pronunciation mistakes, such as mixing up "pull" and "pool." Students are familiarized with many irregular English spelling rules and exceptions, and are shown how such irregularities can contribute to pronunciation errors. A native language guide references problematic accent issues for 13 different language backgrounds.

Approximation and Online Algorithms Sep 21 2019 The Fifth Workshop on Approximation and Online Algorithms (WAOA 2007) focused on the design and analysis of algorithms for online and computationally hard problems. Both kinds of problems have a large number of applications from a variety of fields. WAOA 2007 took place in Eilat, Israel, during October 11-12, 2007. The workshop was part of the ALGO 2007 event that also hosted ESA 2007, and PEGG 2007. The previous WAOA workshops were held in Budapest (2003), Rome (2004), Palma de Mallorca (2005) and Zurich (2006). The proceedings of these previous WAOA workshops have appeared as LNCS volumes 2909, 3351, 3879 and 4368, respectively. Topics of interest for WAOA 2007 were: algorithmic game theory, approximation classes, coloring and partitioning, competitive analysis, computational finance, cuts and connectivity, geometric problems, inapproximability results, mechanism design, network design, packing and covering, paradigms for design and analysis of approximation and online algorithms, randomization techniques, real-world applications, and scheduling problems. In response to the call for papers, we received 56 submissions. Each submission was reviewed by at least three referees, and the vast majority by at least four referees. The submissions were mainly judged on originality, technical quality, and relevance to the topics of the conference. Based on the reviews, the Program Committee selected 22 papers. We are grateful to Andrei Voronkov for providing the EasyChair conference system which was used to manage the electronic submissions, the review process, and the electronic PC meeting. Techno-Sapiens in a Networked Era Dec 25 2019 Techno-Sapiens gathers together leading scholars of technology, theology, and religion in order to explore the ways in which modern technology is neither solely a dehumanizing force in the world nor a mere instrument for evangelizing the world, but rather the very means by which incarnation happens—the media in and through which humans love the (digital) other. The essays explore the question of how technology encourages and/or inhibits the human capacity to love our neighbor through asking the following questions: Who is my (digital) neighbor? How does social media in particular allow us to love our (digital) neighbor? How does one become a (digital) neighbor?
