The aim of the volume is to make prose more visible as a subject and as a mode of writing. The work not only deals with the range and variety of the substance and types of English prose, but also analyses the forms and styles of writing adopted in the early modern period, ranging from the Euphuistic nature of prose fiction inaugurated by John Lyly's mannered novel, to the aggressive polemic of the

Marprelate controversy; from the scatological humour of comic writing to the careful modulations of the most significant sermons of the age; and from the pithy and concise English essays of Francis Bacon to the ornate and meandering style of John Florio's translation of Montaigne's famous collection. Each essay provides an overview as well as comment on key passages, and a select guide to further reading.
