Writing and Representing Qualitative Research Feb 07 2021 This book addresses foundational areas of qualitative writing (such as journal articles and dissertations), aesthetic representations (including poetry and autoethnography), publishing, and reflexivity in representation in one practical and engaging text based on real experiences. Author Maria K.E. Lahman draws on her experiences as a qualitative research professor and writing instructor, and as someone who has published widely in scholarly journals, employing both traditional and more innovative forms of writing. The first part of the book covers writing tips; how to represent data; how to write a qualitative thematic journal article; how to write a qualitative dissertation; and provides guidance on the publication process. The second part encourages the qualitative researcher to move beyond traditional forms of writing and consider how qualitative research can be represented more aesthetically: as poems, autoethnographies, and visually. The book concludes with a chapter on reflexivity in research representations. Throughout, the author provides vivid examples from her own work, and that of graduate students and colleagues.

The Periodic Table: Nature's Building Blocks Dec 05 2020 The Periodic Table: Nature's Building Blocks: An Introduction to the Naturally Occurring Elements, Their Origins and Their Uses addresses how minerals and their elements are used, where the elements come from in nature, and their applications in modern society. The book is structured in a logical way using the periodic table as its outline. It begins with an introduction of the history of the periodic table and a short introduction to mineralogy. Element sections contain their history, how they were discovered, and a

description of the minerals that contain the element. Sections conclude with our current use of each element. Abundant color photos of some of the most characteristic minerals containing the element accompany the discussion. Ideal for students and researchers working in inorganic chemistry, minerology and geology, this book provides the foundational knowledge needed for successful study and work in this exciting area. Describes the link between geology, minerals and chemistry to show how chemistry relies on elements from nature Emphasizes the connection between geology, mineralogy and daily life, showing how minerals contribute to the things we use and in our modern economy Contains abundant color photos of each mineral that bring the periodic table to life

Simplify Your Study Apr 21 2022 This innovative book provides clear and straight-forward strategies which help students to understand the conventions of academic assignments and what lecturers expect from their work. Simplify Your Study is organised around nine core units which focus on the 'sticking points' of university study, including organisation and planning, reading and note-making strategies, producing essays, critical thinking, delivering presentations and preparing for exams. Packed with tried-and-tested strategies for success, this essential resource will help students of all disciplines and levels to achieve their academic potential.

Grey Literature in Library and Information Studies Jun 23 2022 The further rise of electronic publishing has come to change the scale and diversity of grey literature facing librarians and other information practitioners. This compiled work brings together research and authorship over the past decade dealing with both the supply and demand sides of grey literature. While this book is written with students and instructors of Colleges and Schools of Library and Information Science in mind, it likewise serves as a reader for information professionals working in any and all like knowledge-based communities.

Think Write Mar 28 2020 Think Write is a comprehensive critical thinking, research methodology, and academic writing handbook. It is designed to aid students to understand and meet the varied expectations of higher theological studies. Concepts such as critical thinking, theological thinking, problem statement, primary question, methodology, plagiarism, citation format, can all be difficult to grasp. This book explains each of these in a way that would make sense to MTh and PhD students from the various theological departments. Along with advice to enhance academic research and reading, practical suggestions are offered to improve research assignments, Thesis Proposals, and dissertations. Included is a citation guide based on the Chicago Manual of Style.

Plagiarism, the Internet, and Student Learning Sep 26 2022 Written for Higher Education educators, managers and policy-makers, Plagiarism, the Internet and Student Learning combines theoretical understandings with a practical model of plagiarism and aims to explain why and how plagiarism developed. It offers a new way to conceptualize plagiarism and provides a framework for professionals dealing with plagiarism in higher education. Sutherland-Smith presents a model of plagiarism, called the plagiarism continuum, which usefully informs discussion and direction of plagiarism management in most educational settings. The model was developed from a cross-disciplinary examination of plagiarism with a particular focus on understanding how educators and students perceive and respond to issues of plagiarism. The evolution of plagiarism, from its birth in Law, to a global issue, poses challenges to international educators in diverse cultural settings. The case studies included are the voices of educators and students discussing the complexity of plagiarism in policy and practice, as well as the tensions between institutional and individual responses. A review of international studies plus qualitative empirical research on plagiarism, conducted in Australia between 2004-2006, explain why it has emerged as a major issue. The book examines current teaching approaches in light of issues surrounding plagiarism, particularly Internet plagiarism. The model affords insight into ways in which teaching and learning approaches can be enhanced to cope with the ever-changing face of plagiarism. This book challenges Higher Education educators, managers and policy-makers to examine their own beliefs and practices in managing the phenomenon of

plagiarism in academic writing.

A Beginner's Guide to Using Open Access Data Dec 17 2021 Open Access Data is emerging as a source for cutting edge scholarship. This concise book provides guidance from generating a research idea to publishing results. Both young researchers and well-established scholars can use this book to upgrade their skills with respect to emerging data sources, analysis, and even post-publishing promotion. At the end of each chapter, a tutorial simulates a real example, allowing readers to apply what they learned about accessing open data, and analyzing this data to reach the results. This book can be of use by established researchers analyzing data, publishing, and actively promoting ongoing and research. Key selling features: Describes the steps, from A-Z, for doing open data research Includes interactive tutorials following each chapter Provides guidelines for readers so that they can use their own accessed open data Reviews recent software and websites promoting and enabling open data research Supplements websites which update recent open data sources National 4 & 5 Computing Science Jul 24 2022 Provides full coverage of the National 4 & 5 course and is endorsed by SQA. This comprehensive textbook provides full coverage of the Computing Science courses offered by the Scottish Qualifications Authority at both National 4 and 5 levels. The book is divided into two core units of the syllabus, Software Design and Development and Information System Design and Development, and is attractively designed in full colour throughout. - The first comprehensive book for National 4 and 5 Computing Science - Written by the bestselling author of 'Standard Grade Computing Studies' **Preventing Plagiarism and Cheating** Apr 09 2021

Research Methods: Masters and Phd Students Handbook Jan 06 2021 This book is designed specifically for Master's degree and PhD students working on developing their thesis. It is a practical book designed to guide students from the initial stages of research proposal preparation to final stages of thesis report writing. It further gives proper guidance on how to approach the thesis defense and how one can go further in publication of articles in peer reviewed journals or turning the thesis to a

book.

Adopting Information Systems Perspectives from Small Organizations Aug 25 2022 Why do organizations adopt information systems? Is it just because of financial reasons, of concerns for efficiency? Or is it due to external pressures, such as competitor pressure, that an organization adopts an information system? And, how does the adoption take place? Is it a linear process, or is the process one of conflicts? Does a specific person govern this process, or do we have multiple parties involved? What happens if these conflicts occur among those involved? How does the organization move on and achieve a successful information system adoption? By investigating two organizations, one international academic journal and one South American manufacturing company, this thesis aims to investigate the whys and hows of information system adoption, and aims to contribute to the discourse on information system adoptions in small organizations – an often underrepresented segment in information system adoption literature. By adopting different theoretical lenses throughout the five research papers included, this body of work suggests that even when seemingly simple, information system adoptions can become rather complex. The cases reveal that the role of information systems and issues related to information system adoptions are often not well thought-out in the early days of the organization. The actors' understandings of adoption and consequences mature and the information systems become more intertwined. Common use of stakeholder theory introduces general stakeholders and their interaction with the focal organization. The cases reveal that the adoption process involves multiple actors, even within what would initially appear as a stakeholder, and that those actors can be in conflict with each other. These conflicts often lead to negotiations, and the cases reveal that these negotiations are opportunities of learning; the actors engage with the information system and with each other, gaining new knowledge about the issues at hand. The dissertation argues that there are various social worlds in information system adoptions, and various factors – ranging from organizational structure to social norms – that often affect why and how the organization undergoes an adoption process.

The multiple power relations and divergent interests of stakeholders in these adoption processes, and how information systems affect other parts of the organization, reinforce the need for a well thought-out, flexible and reflexive approach to information system adoptions.

Ethical and Unethical Methods of Plagiarism Prevention in Academic Writing Jun 30 2020 Research Paper from the year 2014 in the subject Pedagogy - General, language: English, comment: Cite as: Bakhtiyari, Kaveh, Salehi, Hadi, Embi, Mohamed Amin, Shakiba, Masoud, Zavvari, Azam, Shahbazi-Moghadam, Masoomeh, . . . Mohammadjafari, Marjan. (2014). Ethical and Unethical Methods of Plagiarism Prevention in Academic Writing. International Education Studies, 7(7), 52-62. doi: 10.5539/ies.v7n7p52, abstract: This paper discusses plagiarism origins, and the ethical solutions to prevent it. It also reviews some unethical approaches, which may be used to decrease the plagiarism rate in academic writings. We propose eight ethical techniques to avoid unconscious and accidental plagiarism in manuscripts without using online systems such as Turnitin and/or iThenticate for cross checking and plagiarism detection. The efficiency of the proposed techniques is evaluated on five different texts using students individually. After application of the techniques on the texts, they were checked by Turnitin to produce the plagiarism and similarity report. At the end, the "effective factor" of each method has been compared with each other; and the best result went to a hybrid combination of all techniques to avoid plagiarism. The hybrid of ethical methods decreased the plagiarism rate reported by Turnitin from nearly 100% to the average of 8.4% on 5 manuscripts.

How to Practice Academic Medicine and Publish from Developing Countries? Oct 27 2022 This is an open access book. The book provides an overview of the state of research in developing countries – Africa, Latin America, and Asia (especially India) and why research and publications are important in these regions. It addresses budding but struggling academics in low and middle-income countries. It is written mainly by senior colleagues who have experienced and recognized the challenges with design, documentation, and publication of health research in the developing world. The book includes short chapters providing insight into planning research at the undergraduate or postgraduate level, issues related to research ethics, and conduct of clinical trials. It also serves as a guide towards establishing a research question and research methodology. It covers important concepts such as writing a paper, the submission process, dealing with rejection and revisions, and covers additional topics such as planning lectures and presentations. The book will be useful for graduates, postgraduates, teachers as well as physicians and practitioners all over the developing world who are interested in academic medicine and wish to do medical research.

Interminable Wars vs. The Utopia Options Jun 18 2019 The Waveform Politics series present Gary C. Gibson's essays on U.S. contemporary history topics with analysis of political policy trends and national interest issues. The author's opinion of exclusivist broadcast media is that it is a politically corrupting tool in support of concentrating wealth within a global corporatist-socialist political agenda. The essays have a philosophical spin. Protracted nation-rebuilding conflicts in Iraq and Afghanistan and misc. fiscal perfidy bust the U.S. public budget without necessity.

Academic Writing for College Students Nov 16 2021 Do you know how to write a Professional Academic Essay, Research Paper, Book Report, Annotated Bibliography? Read the Academic Writing book for the best help! No experience in Academic Writing! Do not Worry! After reading the book, students will learn about how to write academic assignments (Essay, Research Papers, Book Reports, and Annotated Bibliography) in the shortest possible time and accurately. Table of Contents Chapter 1: What is Academic Writing? Chapter 2: Characteristics of Academic Writing Chapter 3: Structure of Academic Writing Chapter 4: Outline (Essay, Research Paper, Book Report, and Annotated Bibliography) Chapter 5: Types of Academic Writing Chapter 6: How to Properly Cite Sources in Academic Assignments? Chapter 7: Paraphrasing Chapter 8: Grammar Check Chapter 9: Plagiarism Chapter 10: Editing and Proofreading Chapter 11: 11 Practical Steps to

Write a Professional Academic Assignment Chapter 12: Examples of Assignments (APA and MLA(Essay), Harvard (Research Paper), Chicago (Essay) and Annotated Bibliography Chapter 13: Practice Test

Proceedings of the First International Conference on Intelligent Computing and Communication Oct 03 2020 The book covers a wide range of topics in Computer Science and Information Technology including swarm intelligence, artificial intelligence, evolutionary algorithms, and bio-inspired algorithms. It is a collection of papers presented at the First International Conference on Intelligent Computing and Communication (ICIC2) 2016. The prime areas of the conference are Intelligent Computing, Intelligent Communication, Bio-informatics, Geo-informatics, Algorithm, Graphics and Image Processing, Graph Labeling, Web Security, Privacy and e-Commerce, Computational Geometry, Service Orient Architecture, and Data Engineering.

Text, Speech and Dialogue Nov 23 2019 Here are the refereed proceedings of the 9th International Conference on Text, Speech and Dialogue, TSD 2006. The book presents 87 revised full papers together with 2 invited papers reviewing state-of-the-art research in the field of natural language processing. Coverage ranges from theoretical and methodological issues to applications with special focus on corpora, texts and transcription, speech analysis, recognition and synthesis, as well as their intertwining within NL dialogue systems.

The Internet Research Handbook Jun 11 2021 Ideal as a course textbook at undergraduate and graduate level in a range of social science disciplines where doing a research project is an integral part of the course. It will also be of great use to postgraduate students who are about to start research for a dissertation, and for experienced academic researchers who are trying to incorporate the Internet into their research practice.

Databases and Information Systems V Oct 23 2019 The Eighth International Baltic Conference on Databases and Information Systems took place on June 25 2008 in Tallinn, Estonia. This conference is continuing a series of successful bi-annual Baltic conferences on databases and information systems (IS). The aim is to provide a wide international forum for academics and practitioners in the field of databases and modern information systems for exchanging their achievements in this area. The original research results presented in Databases and Information Systems V mostly belong to novel fields of IS and database research such as database technology and the semantic web, ontology-based IS, IS and AI technologies and IS integration. The contribution of Dr. Jari Palomauml;ki showed how different ontological commitments affect the way we are modeling the world when creating an information system. As semantic technologies have been gaining more attention recently, a special session on semantic interoperability of IS was organized. The invited talks from each Baltic State gave a good insight how semantic interoperability initiatives are developing in each of the Baltic States and how they relate to the European semantic interoperability framework.

Advances in Intelligent Networking and Collaborative Systems Jan 26 2020 This book provides the latest research findings, and discusses, from both theoretical and practical perspectives, innovative research methods and development techniques related to intelligent social networks and collaborative systems, intelligent networking systems, mobile collaborative systems and secure intelligent cloud systems. It also presents the synergies among various paradigms in such a multi-disciplinary field of intelligent collaborative systems. With the rapid development of the Internet, we are experiencing a shift from the traditional sharing of information and applications as the main purpose of the Web to an emergent paradigm, which locates people at the very centre of networks and exploits the value of individuals' connections, relations and collaboration. Social networks are also playing a major role in the dynamics and structure of intelligent Web-based networking and collaborative systems. Virtual campuses, virtual communities and organizations strongly leverage intelligent networking and collaborative systems by means of a great variety of formal and informal electronic relations, such as business-to-business, peer-to-peer and various types of online collaborative learning interactions, including the emerging e-

learning systems. This has resulted in entangled systems that need to be managed efficiently and autonomously. In addition, the latest, powerful technologies based on grid and wireless infrastructure as well as cloud computing are currently enhancing collaborative and networking applications significantly, but are also facing new issues and challenges. The principal purpose of the research and development community is to stimulate research that will lead to the creation of responsive environments for networking and, in the longer term, the development of adaptive, secure, mobile, and intuitive intelligent systems for collaborative work and learning.

False Feathers Dec 25 2019 Since human beings have been writing it seems there has been plagiarism. It is not something that sprouted with the advent of the Internet. Teachers have been struggling for years in countries all over the globe to find good methods for dealing with the problem of plagiarizing students. How do we spot plagiarism? How do we teach them not to plagiarize? And how do we deal with those who have been found out to be plagiarists? The purpose of this book is to collect material on the various aspects of plagiarism in education with special attention given to the German problem of dissertation plagiarism. Since there is a wide-spread interest in the German plagiarism situation and in strategies for dealing with it, the book is written in English in order to be accessible to a larger audience.

The Complete Step-by-step Guide to Designing and Teaching Online Courses Feb 19 2022 In this valuable resource, experts share deep knowledge including practical "how-to" and preventive trouble-shooting tips. Instructors will learn about course design and development, instructional methods for online teaching, and student engagement and community building techniques. The book contains successful teaching strategies, guidance for facilitating interactions and responding to diversity, and assessments, as well as future directions for online learning. With many field-tested examples and practice assignments, and with voices from students, teachers, and experts, this book arms instructors and administrators with the tools they need to teach effective and empowering online courses. This one-stop resource addresses all of the core elements of online teaching in terms that are universally applicable to any content area and at any instructional level.

The Palgrave Handbook of Experiential Learning in International Business Aug 01 2020 The Handbook of Experiential Learning In International Business is a one-stop source for international managers, business educators and trainers who seek to either select and use an existing experiential learning project, or develop new projects and exercises of this kind.

Merchants of Truth Jul 12 2021 Former executive editor of The New York Times and one of our most eminent journalists Jill Abramson provides a "valuable and insightful" (The Boston Globe) report on the disruption of the news media over the last decade, as shown via two legacy (The New York Times and The Washington Post) and two upstart (BuzzFeed and VICE) companies as they plow through a revolution that pits old vs. new media. "A marvelous book" (The New York Times Book Review), Merchants of Truth is the groundbreaking and gripping story of the precarious state of the news business. The new digital reality nearly kills two venerable newspapers with an aging readership while creating two media behemoths with a ballooning and fickle audience of millennials. "Abramson provides this deeply reported insider account of an industry fighting for survival. With a keen eye for detail and a willingness to interrogate her own profession, Abramson takes readers into the newsrooms and boardrooms of the legacy newspapers and the digital upstarts that seek to challenge their dominance" (Vanity Fair). We get to know the defenders of the legacy presses as well as the outsized characters who are creating the new speed-driven media competitors. The players include Jeff Bezos and Marty Baron (The Washington Post), Arthur Sulzberger and Dean Baquet (The New York Times), Jonah Peretti (BuzzFeed), and Shane Smith (VICE) as well as their reporters and anxious readers. Merchants of Truth raises crucial questions that concern the well-being of our society. We are facing a crisis in trust that threatens the free press. "One of the best takes yet on journalism's changing fortunes" (Publishers Weekly, starred review), Abramson's book points us to the future.

Internet of Things and Big Data Analytics

Toward Next-Generation Intelligence Nov 04 2020 This book highlights state-of-the-art research on big data and the Internet of Things (IoT), along with related areas to ensure efficient and Internet-compatible IoT systems. It not only discusses big data security and privacy challenges, but also energy-efficient approaches to improving virtual machine placement in cloud computing environments. Big data and the Internet of Things (IoT) are ultimately two sides of the same coin, yet extracting, analyzing and managing IoT data poses a serious challenge. Accordingly, proper analytics infrastructures/platforms should be used to analyze IoT data. Information technology (IT) allows people to upload, retrieve, store and collect information, which ultimately forms big data. The use of big data analytics has grown tremendously in just the past few years. At the same time, the IoT has entered the public consciousness, sparking people's imaginations as to what a fully connected world can offer. Further, the book discusses the analysis of real-time big data to derive actionable intelligence in enterprise applications in several domains, such as in industry and agriculture. It explores possible automated solutions in daily life, including structures for smart cities and automated home systems based on IoT technology, as well as health care systems that manage large amounts of data (big data) to improve clinical decisions. The book addresses the security and privacy of the IoT and big data technologies, while also revealing the impact of IoT technologies on several scenarios in smart cities design. Intended as a comprehensive introduction, it offers in-depth analysis and provides scientists, engineers and professionals the latest techniques, frameworks and strategies used in IoT and big data technologies.

The Psychologist's Companion Jan 18 2022 This is a comprehensive, readable guide for career success in academic psychology, including writing, speaking, and even finding a publisher.

Teaching English Literature 16–19 Sep 14 2021 Teaching English Literature 16 – 19 is an essential new resource that is suitable for use both as an introductory guide for those new to teaching literature and also as an aid to reflection and renewal for more experienced teachers. Using the central philosophy that students will learn best when actively engaged in discussion and encouraged to apply what they have learnt independently, this highly practical new text contains: discussion of the principles behind the teaching of literature at this level; guidelines on course planning, pedagogy, content and subject knowledge; advice on teaching literature taking into account a range of broader contexts, such as literary criticism, literary theory, performance, publishing, creative writing and journalism; examples of practical activities, worksheets and suggestions for texts; guides to available resources. Aimed at English teachers, teacher trainees, teacher trainers and advisors, this resource is packed full of new and workable ideas for teaching all English literature courses.

Engaging Learners Through Emerging Technologies Sep 02 2020 This book constitutes the refereed proceedings of the International Conference on ICT in Teaching and Learning, ICT 2012, held in Hong Kong, China, in July 2012. The 19 revised full papers presented were carefully reviewed and selected from numerous submissions. They explore the use of information technology to improve learning and teaching and showcase innovative pedagogical practices. The papers are organized in topical sections on the construct of student engagement and the applications of ICT; emerging pedagogies through ICT; applications of ICT in teaching and learning; research/case studies on ICT in engaged learning; and finally three papers on open textbooks, which address the current problems with conventional textbooks in Hong Kong.

Writing Your Journal Article in Twelve Weeks May 30 2020 This book provides you with all the tools you need to write an excellent academic article and get it published.

Citation-based Plagiarism Detection Apr 28 2020 Plagiarism is a problem with far-reaching consequences for the sciences. However, even today's best software-based systems can only reliably identify copy & paste plagiarism. Disguised plagiarism forms, including paraphrased text, cross-language plagiarism, as well as structural and idea plagiarism often remain undetected. This weakness of current systems results in a large percentage of

scientific plagiarism going undetected. Bela Gipp provides an overview of the state-of-the art in plagiarism detection and an analysis of why these approaches fail to detect disguised plagiarism forms. The author proposes Citation-based Plagiarism Detection to address this shortcoming. Unlike character-based approaches, this approach does not rely on text comparisons alone, but analyzes citation patterns within documents to form a language-independent "semantic fingerprint" for similarity assessment. The practicability of Citation-based Plagiarism Detection was proven by its capability to identify so-far non-machine detectable plagiarism in scientific publications.

Human Development and Interaction in the Age of Ubiquitous Technology Feb 25 2020 The human condition is affected by numerous factors in modern society. In modern times, technology is so integrated into culture that it has become necessary to perform even daily functions. Human Development and Interaction in the Age of Ubiquitous Technology is an authoritative reference source for the latest scholarly research on the widespread integration of technological innovations around the globe and examines how human-computer interaction affects various aspects of people's lives. Featuring emergent research from theoretical perspectives and case studies, this book is ideally designed for professionals, students, practitioners, and academicians.

The International Student's Guide to UK Education Sep 21 2019 Are you thinking of studying at university in Britain? Do you feel confused about which course is best for you, which university to choose, and how to apply? Are you wondering about what kinds of challenges you will be faced with, how best to approach them and how to overcome them? If so, this guidebook is for you. Honest and accurate, this book acts as an international student introduction and cultural guide to UK Higher Education. It informs and guides students in their preparation for all aspects of UK HE, from university selection and application through to participation, and provides a clear understanding of how British universities function. Helping international students make the most of the many opportunities that university offers, this text will expand your

knowledge of UK Higher Education with regards to: Application procedures Finances Self-awareness, cultural understanding and adaptation (social and academic) University administrative procedures, facilities and support Work and career information and advice. The International Student's Guide to UK Education is a comprehensive guide that will help students to develop critical and reflective ability in order to become independent, well-informed and empowered decision makers.

Methods in Biotechnology Jul 20 2019 As rapid advances in biotechnology occur, there is a need for a pedagogical tool to aid current students and laboratory professionals in biotechnological methods; Methods in Biotechnology is an invaluable resource for those students and professionals. Methods in Biotechnology engages the reader by implementing an active learning approach, provided advanced study questions, as well as pre- and post-lab questions for each lab protocol. These self-directed study sections encourage the reader to not just perform experiments but to engage with the material on a higher level, utilizing critical thinking and troubleshooting skills. This text is broken into three sections based on level – Methods in Biotechnology, Advanced Methods in Biotechnology I, and Advanced Methods in Biotechnology II. Each section contains 14-22 lab exercises, with instructor notes in appendices as well as an answer guide as a part of the book companion site. This text will be an excellent resource for both students and laboratory professionals in the biotechnology field.

The Little Book of Plagiarism Mar 08 2021 A concise, lively, and bracing exploration of an issue bedeviling our cultural landscape–plagiarism in literature, academia, music, art, and film–by one of our most influential and controversial legal scholars. Best-selling novelists J. K. Rowling and Dan Brown, popular historians Doris Kearns Goodwin and Stephen Ambrose, Harvard law professor Charles Ogletree, first novelist Kaavya Viswanathan: all have rightly or wrongly been accused of plagiarism–theft of intellectual property–provoking widespread media punditry. But what exactly is plagiarism? How has the meaning of this notoriously ambiguous term

changed over time as a consequence of historical and cultural transformations? Is the practice on the rise, or just more easily detectable by technological advances? How does the current market for expressive goods inform our own understanding of plagiarism? Is there really such a thing as "cryptomnesia," the unconscious, unintentional appropriation of another's work? What are the mysterious motives and curious excuses of plagiarists? What forms of punishment and absolution does this "sin" elicit? What is the good in certain types of plagiarism? Provocative, insightful, and extraordinary for its clarity and forthrightness, The Little Book of Plagiarism is an analytical tour de force in small, the work of "one of the top twenty legal thinkers in America" (Legal Affairs), a distinguished jurist renowned for his adventuresome intellect and daring iconoclasm.

Computational Intelligence in Data Mining Aug 13 2021 This proceeding discuss the latest solutions, scientific findings and methods for solving intriguing problems in the fields of data mining, computational intelligence, big data analytics, and soft computing. This gathers outstanding papers from the fifth International Conference on "Computational Intelligence in Data Mining" (ICCIDM), and offer a "sneak preview" of the strengths and weaknesses of trending applications, together with exciting advances in computational intelligence, data mining, and related fields.

Secrets of the Six-Figure Author May 22 2022 Whether you're a self-published author, traditionally published or just starting out writing your first book, there are dozens of obstacles standing between you and six-figure success as an author. Wouldn't it be helpful if you knew ahead of time what those obstacles will be and how to overcome them quickly and easily? In Secrets of the Six-Figure Author you will learn the 12 key obstacles every author must face and how to blast through them without breaking a sweat.

Writing for College: the Eight Step Program to Writing Academic Argument Papers Using the Template Method Mar 20 2022
Developments Of Artificial Intelligence Technologies In Computation And Robotics - Proceedings Of The 14th International Flins Conference (Flins 2020) May 10 2021 FLINS, an

acronym introduced in 1994 and originally for Fuzzy Logic and Intelligent Technologies in Nuclear Science, is now extended into a well-established international research forum to advance the foundations and applications of computational intelligence for applied research in general and for complex engineering and decision support systems.The principal mission of FLINS is bridging the gap between machine intelligence and real complex systems via joint research between universities and international research institutions, encouraging interdisciplinary research and bringing multidiscipline researchers together.FLINS 2020 is the fourteenth in a series of conferences on computational intelligence systems.

The Psychology of Effective Studying Aug 21 2019 This book provides a vital guide for students to key study skills that are instrumental in success at university, covering time management, academic reading and note-taking, academic integrity, preparation of written assignments, teamwork and presentations. With each chapter consisting of sub-sections that are titled with a single piece of fundamental advice, this is the perfect 'hit the ground running' resource for students embarking on their undergraduate studies. The book uses evidence from psychology to account for the basic errors that students make when studying, illuminating how they can be addressed simply and effectively. Creating an 'insider's guide' to the core requisite skills of studying at degree level, and using a combination of research and practical examples, the author conveys where students often go fundamentally wrong in their studying practices and provides clear and concise advice on how they can improve. Written in a humorous and irreverent tone, and including illustrations and examples from popular culture, this is the ideal alternative and accessible study skills resource for students at undergraduate level, as well as any reader interested in how to learn more effectively.
