William C. Van Horne Sep 26 2022

William C. Van Horne Jul 24 2022 William C. Van Horne was one of North America's most accomplished men. Born in Illinois in 1843, Van Horne started working in the railway business at a young age. In 1881 he was lured north to Canada to become general manager of the fledgling Canadian Pacific Railway. The railroading general pushed through construction of the CPR's transcontinental line and then went on to become the company's president. During his time with the CPR, Van Horne developed a telegraph service, launched the Empress line of Pacific steamships in 1891, and founded CP Hotels. He capped his career by opening up Cuba's interior with a railway. A man of prodigious energy and many talents, he also became Canada's foremost art collector and one of the country's leading financiers. For all of his amazing accomplishments, Van Horne was knighted in 1894. When he died church bells throughout the length and breadth of Cuba tolled to mark his passing, and when his funeral train made its way across Canada, all traffic on the CPR system was suspended for five minutes.

The Supreme Court: Controversies, Cases, and Characters from

John Jay to John Roberts [4 Volumes] Jan 18 2022 An insightful,

chronological—by chief justice—examination of the Supreme Court that enables students and readers to understand and appreciate the

constitutional role the Court plays in American government and society.

American citizens need to understand the importance of the Supreme

Court in determining how our government and society operates,

regardless of whether or not they agree with the Court's opinions.

Unfortunately, the role and powers of the third branch of government are

not well understood by the American public. After an introduction and

overview to the history of the Supreme Court from 1789 to 2013, this

book examines the Court's decisions chronologically by Chief Justice,

allowing readers to grasp how the role and powers of the Court have

developed and shifted over time. The chapters depict the Court as the

essential agent of review and an integrated part of the government,

regardless of the majority/minority balance on the Court, and of which

political party is in the White House or controlling the House or Senate.

Useful for high school students, undergraduate students, and general

readers researching the Supreme Court in general, investigating specific

issues, or seeking answers to personal interest questions Provides an

accessible resource for chronologically tracing the development of civil

and human rights issues from the Warren Court to the present Examines

the legacy of each Chief Justice's Court by its significant cases or

decisions as well as its influence on the historical era Notes the dramatic

or long-lasting effects of Court decisions and addresses the most

controversial decisions of the 21st century, underscoring the significance

Nation Maker Feb 07 2021 #1 NATIONAL BESTSELLER An exciting story, passionately told and rich in detail, this major biography is the second volume of the bestselling, award-winning John A: The Man Who Made Us, by well-known journalist and highly respected author Richard Gwyn. John A. Macdonald, Canada's first and most important prime minister, is the man who made Confederation happen, who built this country over the next quarter century, and who shaped what it is today.

From Confederation Day in 1867, where this volume picks up, Macdonald

finessed a reluctant union of four provinces in central and eastern

Canada into a strong nation, despite indifference from Britain and

annexationist sentiment in the United States. But it wasn't easy. The wily

Macdonald faced constant crises throughout these years, from Louis

Riel's two rebellions through to the Pacific Scandal that almost undid his

government and his quest to find the spine of the nation: the railroad

that would link east to west. Gwyn paints a superb portrait of Canada

and its leaders through these formative years and also delves deep to

show us Macdonald the man, as he marries for the second time, deals

with the birth of a disabled child, and the assassination of his close friend

Darcy McGee, and wrestles with whether Riel should hang. Indelibly,

Gwyn shows us Macdonald's love of this country and his ability to joust

with forces who would have been just as happy to see the end of Canada

before it had really begun, creating a must-read for all Canadians.

Navigating a Changing World Apr 09 2021 This volume addresses the

governance and evolution of Canada's international policies, and the

Left of Bang Apr 21 2022 "At a time when we must adapt to the

changing character of conflict, this is a serious book on a serious issue

that can give us the edge we need." —General James Mattis, USMC, Ret.

"Left of Bang offers a crisp lesson in survival in which Van Horne and

Riley affirm a compelling truth: It's better to detect sinister intentions

early than respond to violent actions late. Left of Bang helps readers

avoid the bang." —Gavin de Becker, bestselling author of The Gift of Fear

"Rare is the book that is immediately practical and interesting. Left of

Bang accomplishes this from start to finish. There is something here for

everyone in the people business and we are all in the people business."

—Joe Navarro, bestselling author of What Every BODY is Saying. "Left of

Bang is a highly important and innovative book that offers a substantial

contribution to answering the challenge of Fourth Generation war

(4GW)." —William S. Lind, author of Maneuver Warfare Handbook "Like

Sun Tzu's The Art of War, Left of Bang isn't just for the military. It's a

must read for anyone who has ever had a gut feeling that something's

not quite right...be it walking down the street, sitting in a corporate

boardroom, or even entering an empty home." --Steven Pressfield,

bestselling author of The Lion's Gate, The Warrior Ethos and Gates of

Fire "An amazing book! Applying the lessons learned during the longest

war in American history, and building on seminal works like The Gift of

Fear and On Combat, this book provides a framework of knowledge that

will bring military, law enforcement, and individual citizens to new levels

of survival mindset and performance in life-and-death situations. Left of

Bang is an instant classic." --Lt. Colonel Dave Grossman, U.S. Army Ret.,

author of On Combat and On Killing -- You walk into a restaurant and get

an immediate sense that you should leave. -- You are about to step onto

an elevator with a stranger and something stops you. -- You interview a

potential new employee who has the resume to do the job, but something

tells you not to offer a position. These scenarios all represent LEFT OF

BANG, the moments before something bad happens. But how many times

have you talked yourself out of leaving the restaurant, getting off the

elevator, or getting over your silly "gut" feeling about someone? Is there

a way to not just listen to your inner protector more, but to actually increase your sensitivity to threats before they happen? Legendary Marine General James Mattis asked the same question and issued a directive to operationalize the Marine Corps' Combat Hunter program. A comprehensive and no-nonsense approach to heightening each and every one of our gifts of fear, LEFT OF BANG is the result.
