Josephine Lang Oct 16 2021 Josephine Lang (1815-80) was one of the most gifted, respected, prolific, and widely published song composers of the nineteenth century, yet her life and works have remained virtually unknown. Now, this carefully researched, compelling, and poignant study recognizes the composer for her remarkable accomplishments. Based on years of study of unpublished letters, musical autographs, reviews, and the autobiographical poetry of Lang's husband, Reinhold Köstlin, the biographical portions of the book offer a stunning portrait of the composer as a woman and an artist. In-depth musical analyses interwoven with the biography will be illuminating to scholars and to musicians of all skill levels. The analyses reveal Lang's sensitivity to her chosen poetic texts, as well as the validity of her claim that her songs were her diary; the authors demonstrate that many of the songs are directly connected to the events of Lang's life. The analyses are illustrated by an abundance of musical examples, including a number of complete songs. A companion website, featuring 30 songs by Lang recorded by the authors, complements the text.

Driving Home Jun 12 2021 This lively and diverse bilingual collection of essays by writers and critics examines contemporary Canadian literary arts. The perspectives range from highly personal and introspective to scholarly and objective, yet each adds significantly to an understanding of the dialogue between writers and readers. Proceedings from a workshop held at the Calgary Institute for the Humanities during the summer of 1982, the volume includes such contributors as E.D. Blodgett, Jacques Brault, Richard Giguère, D.G. Jones, Myrna Kostash, Peter Stevens, Aritha van Herk, and Christopher Wiseman. The collection will naturally be of interest to any student of Canadian literature, but the essays also forcefully address, both explicitly and implicitly, the question of a nationalism of the arts, an issue of great importance to performers and critics in many fields.

A Dictionary of Modern English Usage Aug 14 2021 'What grammarians say should be has perhaps less influence on what shall be than even the more modest of them realize ...' No book had more influence on twentieth-century attitudes to the English language in Britain than Henry Fowler's *Dictionary of Modern English Usage*. It rapidly became the standard work of reference for the correct use of English in terms of choice of words, grammar, and style. Much loved for his firm opinions, passion, and dry humour, Fowler has stood the test of time and is still considered the best arbiter of good practice. In this new edition of the original *Dictionary*, David Crystal goes beyond the popular mythology surrounding Fowler's reputation to retrace his method and arrive at a fresh evaluation of his place in the history of linguistic thought. With a wealth of entertaining examples he looks at Fowler's stated principles and the tensions between his prescriptive and descriptive temperaments. He shows that the *Dictionary* does a great more than make normative recommendations and express private opinion. In addition he offers a modern perspective on some 300 entries, in which he shows how English has changed since the 1920s. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

Anticipation Across Disciplines Nov 17 2021 Never before was anticipation more relevant to the life and activity of humankind than it is today. "It is no overstatement to suggest that humanity's future will be shaped by its capacity to anticipate...." (Research Agenda for the 21st Century, National Science Foundation). The sciences and the humanities can no longer risk explaining away the complexity and interactivity that lie at the foundation of life and living. The perspective of the world that anticipation opens justifies the descriptor "the post-Cartesian Revolution." If anticipation is a valid research domain, what practical relevance can we await? Indeed, anticipation is more than just the latest catch-word in marketing the apps developed by the digital technology industry. Due to spectacular advances in the study of the living, anticipation can claim a legitimate place in current investigations and applications in the sciences and the humanities. Biology, genetics, medicine, as well as politics and cognitive, behavioral, and social sciences, provide rich evidence of anticipatory processes at work. Readers seeking a foundation for an anticipation will find in these pages recent outcomes pertinent to plant life, political anticipation, cognitive science, architecture, computation. The authors contributing to this volume frame experimental data in language that can be shared among experts from all fields of endeavor. The major characteristic is the inference from the richness of data to principles and practical consequences.

Motivate Your Writing Jan 27 2020 Energize and organize your writing life by tapping into your fundamental motivators. Note: This second edition has been substantially revised and updated, including 10% more content than the first edition. Aspiring and professional writers alike struggle to stay motivated; in the face of distractions, obligations, and procrastination, the desire to write often fails to become the act of writing. Motivated writers, notes the author, are those who have learned to identify their fundamental emotional drives and who have established a writing routine that satisfies those drives. Kelner draws on the research and insights of motivational psychology to show writers how to harness the energy of these fundamental motivators. With a degree in motivational psychology, Kelner applies not only his training in the field but also his own original research into the motivational patterns typical of writers. Depending on their motivational profile, different writers will respond best to different kinds of feedback and rewards and will function best in different kinds of environments. Kelner explains the basic drives of power, affiliation, and achievement; he shows how these drives are manifested in a wide variety of behaviors; and he provides self-assessment tools to construct your own motivational profile. In clear and accessible terms, and with numerous examples and anecdotes, Kelner shows writers how they can identify their own primary motivations and use that knowledge to arrange their work habits and energize their writing lives.

Anticipation, Agency and Complexity Apr 22 2022 This volume presents a selection of the Proceedings of the Workshop on Anticipation, Agency and Complexity held in Trento (Italy) on April 2017. The contributions contained in the book brilliantly revolve around three core concepts: agency, complexity and anticipation, giving precious insights to further define the discipline of anticipation. In a world that moves increasingly fast, constantly on the verge of disruptive events, more and more scholars and practitioners in any field feel in need of new approaches to make sense of the complexity and uncertainty that the future seems to bear. The theory of anticipation tries to describe how possible futures are intrinsically intertwined with the present.
