Stable Peace May 23 2022 The human race has often put a high value on struggle, strife, turmoil, and excitement. Peace has been regarded as a utopian, unattainable, perhaps dull ideal or as some random element over which we have no control. However, the desperate necessities of the nuclear age have forced us to take peace seriously as an object of both personal and national policy. *Stable Peace* attempts to answer the question, If we had a policy for peace, what would it look like? A policy for peace aims to speed up the historically slow, painful, but persistent transition from a state of continual war and turmoil to one of continual peace. In a stable peace, the war-peace system is tipped firmly toward peace and away from the cycle of folly, illusion, and ill will that leads to war. Boulding proposes a number of modest, easily attainable, eminently reasonable policies directed toward this goal. His recommendations include the removal of national boundaries from political agendas, the encouragement of reciprocal acts of good will between potential enemies, the exploration of the theory and practice of nonviolence, the development of governmental and nongovernmental organizations to promote peace, and the development of research in the whole area of peace and conflict management. Written in straightforward, lucid prose, *Stable Peace* will be of importance to politicians, policy makers, economists, diplomats, all concerned citizens, and all those interested in international relations and the resolution of conflict.

Postcolonial Imaginings Nov 17 2021 This deeply engaging, historically, and culturally informed book provides new perspectives on a wide range of writers, and at the same time provides a radically new development of many of the most pertinent issues in the field of

postcolonial writing and theory. It constitutes a major new engagement between the "postcolonial" and a conception of the literary that is richly innovative in its deployment of psychoanalytic, deconstructive, and other approaches to the text. The book begins with some brief background to the issue of decolonization and its contemporary effects. It is informed throughout by a clear sense of literary and political context, within which chosen texts--by well-known writers (Derek Walcott, Chinua Achebe, Edward Kamau Brathwaite) as well as less well-known ones (Joan Riley, Susan Power, Abdulrazak Gurnah) and writers not often seen in a postcolonial context (James Kelman, Seamus Deane, Hanif Kureishi)--can be situated. The chapters that follow are based around themes such as violent geographics; hallucination, dream and the exotic; mourning and melancholy; diaspora and exile; delocalization and the alibi. This profoundly new approach to the complexities of the postcolonial allows the reader to appreciate some of the richness, but at the same time the political and cultural ambivalence, which underlies postcolonial writing. Throughout the book David Punter continually questions, as one would expect from his many previous books, the definition and scope of the "postcolonial." It is seen throughout as a phenomenon not restricted to the ex- or neo-colonies but as a key characterisation of all our lives at the beginning of the twenty-first century. It is an indissoluble part of the development of national imaginings and, at the same time, an alibi for the emergence of a violently assertive "new world order" committed to the management and obliteration of difference. By juxtaposing texts from different cultural traditions and topographies, from *Things Fall Apart* to *The Bone People*, from *Anot*

representations of Gandhi, Claude Markovits shows how Gandhi's legend has obscured the facts of his public career. Gandhi's professional role in the public sphere, Markovits argues, was heavily influenced by his long and critical phase of maturation in South Africa, a period often dismissed as the precursor to his celebrated work in India. Markovits proposes that Gandhi's later Indian career, marked by his meteoric rise to prominence, was the result of his own radical self-reinvention as he negotiated the pitfalls of political life in order to create his influential political manifesto. In re-evaluating critical stages of Gandhi's career, and his sometimes ambivalent ideological positions, Markovits confronts the discrepancies between his early and late careers, closely rereading the Mahatma's varying intellectual positions as described both within his own writings and in those by commentators and biographers. Rather than seeing Gandhi as an upholder of traditional Indian values, Markovits stresses the paradoxical modernity of Gandhi's anti-modernism.

Walker Evans Mar 29 2020 "As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work."--Jacket.

Scorch Jul 13 2021 In the future world of *Scorch*, America is run by a "corporacracy." Three conglomerates have taken control not by force but by manipulating common beliefs and values through the media, and particularly by playing on Americans' fears of Big Brother. Consumerism and privatization have run amok in this landscape of flashing screens and subtle brainwashing, a world where even city streets and public schools are run by big business. This is a darkly comic first novel of a dystopian future, with echoes of 1984 and *Brave New World*.

She's fallen hard for the giant, taciturn, surly brute, and she positively will have no other. The problem? He's not interested. Not even a little. But Viola cannot afford to lose. And she has her heart set on James. If only he will bend to a bit of persuasion. Is an earl like no other... James Kilbrenner knows how determined the entirely-too-beautiful Miss Darling can be—the daft woman cornered him at a perfectly respectable dinner and mangled his cravat before he could escape. He has no desire to marry, less desire to be pursued, and will certainly not kiss her kissable lips until they are both breathless, no matter how tempted he may be. And only the right one will do... Thrown in her path by a meddling marchioness, James finds himself under sensual siege from a tiny, flirtatious sprite who puts both his heart and his vow to remain unwed at risk. And when scandal looms, he learns the hard way that a man can resist only so long before the indomitable Miss Darling gets her way.

The Continuous Katherine Mortenhoe Jun 24 2022 Katherine Mortenhoe lives in a near future very similar to the present day. Only in her time, dying from anything but old age is unheard of; death has been cured. So when Katherine is diagnosed with a terminal brain disease brought on by an inability to process an ever increasing volume of sensory input, she immediately becomes a celebrity to the “pain-starved public.” But Katherine rejects her tragic role: She will not agree to be the star of a Human Destiny TV show, her last days will not be documented or broadcast. What she doesn't realize is that from the moment of diagnosis she's been watched, not only by television producers but by a new kind of program host, a man with a camera behind his unsleeping eyes. Like Margaret Atwood's MaddAddam trilogy, Kazuo Ishiguro's Never Let Me Go, and the television series Black Mirror, The Continuous Katherine Mortenhoe is a thrilling psychological drama that is as wise about human nature as it is about the nature of technology.

Post-Truth Aug 26 2022 How we arrived in a post-truth era, when “alternative facts” replace actual facts, and feelings have more weight than evidence. Are we living in a post-truth world, where “alternative facts” replace actual facts and feelings have more weight than evidence? How did we get here? In this volume in the MIT Press Essential Knowledge series, Lee McIntyre traces the development of the post-truth phenomenon from science denial through the rise of “fake news,” from our psychological blind spots to the public's retreat into “information silos.” What, exactly, is post-truth? Is it wishful thinking, political spin, mass delusion, bold-faced lying? McIntyre analyzes recent examples—claims about inauguration crowd size, crime statistics, and the popular vote—and finds that post-truth is an assertion of ideological supremacy by which its practitioners try to compel someone to believe something regardless of the evidence. Yet post-truth didn't begin with the 2016 election; the denial of scientific facts about smoking, evolution, vaccines, and climate change offers a road map for more widespread fact

denial. Add to this the wired-in cognitive biases that make us feel that our conclusions are based on good reasoning even when they are not, the decline of traditional media and the rise of social media, and the emergence of fake news as a political tool, and we have the ideal conditions for post-truth. McIntyre also argues provocatively that the right wing borrowed from postmodernism—specifically, the idea that there is no such thing as objective truth—in its attacks on science and facts. McIntyre argues that we can fight post-truth, and that the first step in fighting post-truth is to understand it.

Mass Awakening Oct 28 2022 The Truth has been hidden from us while a global policy of mass depopulation and exploitation has been carried out behind the scenes for the past half-century. The author, an independent journalist, became aware of this agenda only in the past few years. She found it hard to believe, but in-depth research and the testimony of whistleblowers worldwide have exposed these strategies. They include geoengineering (chemtrails), fluoridation of water supplies, GMOs, vaccinations, false flag terrorist attacks, and economic warfare by the group David Wilcock calls the Cabal. However, despite this grim reality, a positive shift of mass awakening is occurring worldwide. Tribunals are being established to prosecute elite offenders; revelations of hidden technology like free-energy and new economic models are being put forth. The author shows how humanity is claiming its rightful heritage as spiritual beings and charts the course of our elevation of consciousness. MASS AWAKENING gives us all real hope for an amazing future. Mass Awakening is Shoshi Herscu's well researched and yet profoundly personal handling of intensely shocking material, rarely covered in print. It is both a true inspiration and a much-needed breath of fresh air. —Ada Tourtsakis PrepareForChangeLeadership.org

'Extreme Economies is a revelation - and a must-read.' Andy Haldane, Chief Economist at the Bank of England To understand how humans react and adapt to economic change we need to study people who live in harsh environments. From death-row prisoners trading in institutions where money is banned to flourishing entrepreneurs in the world's largest refugee camp, from the unrealised potential of cities like Kinshasa to the hyper-modern economy of Estonia, every life in this book has been hit by a seismic shock, violently broken or changed in some way. In his quest for a purer view of how economies succeed and fail, Richard Davies takes the reader off the beaten path to places where part of the economy has been repressed, removed, destroyed or turbocharged. He tells the personal stories of humans living in these extreme situations, and of the financial infrastructure they create. Far from the familiar stock reports, housing crises, or banking scandals of the financial pages, Extreme Economies reveals the importance of human and social capital, and in so doing tells small stories that shed light on today's biggest economic questions. 'A highly original approach to understanding what really makes economies tick.' Mervyn King, former Governor of the Bank of England
