USDA Egg-Grading Manual May 10 2021 United States Department of
Agriculture (USDA) Egg-Grading Manual Agricultural Marketing Service
Agricultural Handbook Number 75 This manual is an aid in teaching both
beginning and experienced egg graders the correct interpretation and
application of the U.S. standards, grades, and weight classes for
eggs. It can serve as a guide in short courses or grading schools when
supplemented with lectures, group discussions, and demonstrations.
This manual should also prove useful to those teaching or working in
the production, processing, and marketing of eggs. Although some of
the material in this manual is not directly related to the actual
grading function, knowledge of it will help graders do a better job in
handling eggs and in maintaining egg quality. Such information will

give graders a better understanding of their job, and will aid them in acquiring the knowledge necessary to do their jobs well. This manual provides graders with an understanding of egg marketing, the purpose of grading, production and processing practices, and Federal-State grading programs. Gravel Roads Mar 28 2020 The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.
