The Knowledge Base for Fisheries Management Oct

23 2019 Fisheries are in a state of crisis throughout the world. While there has been some success, truly effective fisheries management seems beyond our grasp. The knowledge needed for proper management contains a broad array of facts and connections from statistical stock assessments, to the information that allows government agencies to track compliance with rules and beyond. This book describes the state-of-the-art knowledge about fishery systems. Seldom seen in a scientific publication regarding fisheries science, this book presents a multidisciplinary perspective of fisheries management. Leading fisheries

scholars with backgrounds in biology, ecology, economics and sociology ask how management institutions can learn and put their lessons to use. The Knowledge Base for Fisheries Management offers a unique overview of the world of fisheries management and provides the background to draw conclusions of what is needed to improve management. Covering a wide range of regimes, case studies and professional perspectives, this publication will be an obliged reference to anyone involved on fisheries management, assessment, policy making or fisheries development all over the world.

* The only book on the market

that analyzes fisheries in a biological, sociological and economic way * Fills a gap, focusing not only on the production of knowledge for fisheries management but also on how it is used in all steps of the management system and the decision making processes * Focuses on the hot topic: scientific knowledge and society-science based policies * Documents disseminated research from many different management systems, both European and world wide *International Convention for the High Seas Fisheries* Nov 04 2020

Fisheries Subsidies, Sustainable Development and the WTO Mar 20 2022 The

fisheries sector is in crisis. Inappropriate subsidies to the fishing industry are a key factor responsible for worldwide fisheries depletion, overcapitalization and ecosystem degradation. There is an urgent need for an international mechanism to promote the appropriate restructuring of fisheries subsidies in order to create a more sustainable industry. In recent years the leading international forum charged with providing such a mechanism has been the World Trade Organization (WTO). This book explains why and how the reform of fisheries subsidies has become one of the most concrete and

potentially successful international efforts to achieve global environmental, economic and developmental policy coherence. It describes the history and current status of the discussions at the WTO, drawing on UNEP's key documents and reflecting on the major issues.

Accompanying the book is a CD-Rom containing full-text versions of the most important source material used in the publication. The book is aimed at a broad stakeholder audience, including policymakers in the fields of trade, fisheries, environmental economics and international environmental governance, as well as academics and others

authoritative guide to the future challenges that face the public European fisheries policy. Written by a noted expert with 30 years' experience in fisheries policies, the book provides the information needed to analyze how a public EU policy should be evaluated, implemented, and reformed. The book examines the difficulties of implementing the new policy including the application of the objectives of the 2013 policy reform. The author explores the myriad challenges that face the new policy due to global warming, pollution, and other global drivers. The book compares the new policy with other fisheries policy,

particularly with the United States fisheries policy under the Magnusson-Stevens Act. The book offers an opportunity to address and discuss the challenges and obstacles that are not currently in the public domain. This important book: Provides a unique view from a noted expert and former policy insider Offers a critical analysis of a public EU policy from a pro-European standpoint. Gives a foundational resource to aid in the debate on the future of the Common Fisheries Policy Includes topics that go beyond EU's policy and have implications for fisheries' management around the world Written for administrations and stakeholders in the European
