**The Chronicles of the Sidhe** Dec 17 2021 For a thirteen-year period, the reclusive Scottish writer Fiona Macleod enthralled the Victorian reading public with a deluge of stories, novels, poems and essays drawn from the wildly romantic Highland and Island landscape. Although it was later revealed that these works had issued from the pen of William Sharp, it was clear that Fiona Macleod was more than a pseudonym; to Sharp she was

very much an autonomous entity. What's more, the wealth of previously unknown and unheard of myths, names, traditions and beliefs in her writings, while shone through a Celtic prism, show every sign of having emanated from the Realm of Faery. Steve Blamires presents a ground-breaking assessment of the Faery lore within Fiona Macleod's literary output as part of his ongoing study of this enigmatic writer. Building on the established groundwork of his biography of Sharp, *The Little Book of the Great Enchantment*, he explores the mythology and traditions of Faery, their symbolic and magical significance, and the devices employed by Fiona in the transmission of Faery teachings and inspirations. Using examples from Fiona's rich and resonant body of work, his detailed interpretation will enable the reader to tease out the Faery gems that are still to be found woven into the lines and verse of her writings.

**Rethinking History, Science, and Religion** Jun 18 2019 The historical interface between science and religion was depicted as an unbridgeable conflict in the last quarter of the nineteenth century. Starting in the 1970s, such a conception was too simplistic and not at all accurate when considering the totality of that relationship. This volume evaluates the utility of the “complexity principle” in past, present, and future scholarship. First put forward by historian John Brooke over twenty-five years ago, the complexity principle rejects the idea of a single thesis of conflict or harmony, or integration or separation, between science and religion. Rethinking History, Science, and Religion brings together an interdisciplinary group of scholars at the forefront of their fields to consider whether new approaches to the study of science and culture—such as recent developments in research on science and the history of publishing, the global history of science, the geographical examination of space and place, and science and media—have cast doubt on the complexity thesis, or if it remains a serviceable historiographical model.

**The Leprous Man** May 30 2020 This book explores the extraordinarily violent and abusive nature of Stephen Donaldson's male protagonists. Thomas Covenant of The Chronicles is a leper, rotten and physically collapsing. In Mordant's Need and The Gap series the male characters are moral lepers. The Gap offers a Janus-faced male lead in the form of two men who are both multiple rapists. The male hero in Mordant's Need is outwardly socially acceptable but his alter egos are overly corporeal and sexually obsessed. In spite of their unappealing condition, all these protagonists yearn to be loved. Using the psychoanalytical theories of Julia Kristeva, this book identifies reasons for Donaldson's derogatory characterization and provides an insight into why these novels cannot allow their male protagonists to establish viable love relationships. This study also explains why maternal characters are jettisoned from the narratives, considers the problematic nature of father figures and examines the incipient undertow of psychosis.
